

Expected Family Contribution (EFC)

The EFC is a measure of how much the student and his or her family can be expected to contribute to the cost of the student's education for the year. The EFC is calculated according to a formula specified in the law. In this chapter we describe the EFC formula in detail.

GENERAL INFORMATION

All the data the Central Processing System uses to calculate the EFC come from the information the student provides on the FAFSA. The EFC formula uses many variables, including income, assets, the number of persons in the household, and the number of those attending college for the award year.

Every year the Department publishes updated tables used in the EFC calculation. The 2019–2020 updates are in the May 17, 2018, *Federal Register*. Also available at <https://ifap.ed.gov> is the *EFC Formula Guide*.

The law provides three different formulas to calculate the EFC: one for dependent students, one for independent students without dependents other than a spouse, and one for independent students with dependents other than a spouse. In addition, there are three simplified versions of each formula with fewer data elements.

SIMPLIFIED FORMULA

The simplified formula is basically the same as the regular formula except that asset information isn't considered in the calculation. A dependent student qualifies for the simplified calculation if

- the parents' combined adjusted gross income (AGI, for tax filers) or income earned from work (for non-filers) was less than \$50,000, and
- either (1) the parents were not required to file an IRS Form 1040,¹ (2) one of them is a dislocated worker as defined in the Workforce Innovation and Opportunity Act (see *Chapter 2* for a description of dislocated worker), or (3) anyone counted in their household size received a means-tested federal benefit during 2017 or 2018.²

An independent student qualifies for the simplified calculation if

- the student's and spouse's combined AGI (tax filers) or income earned from work (non-filers) was less than \$50,000, and

Basic EFC formulas

- Dependent students
- Independent students
- Independent students with dependents

Special calculations

- Simplified formula (no assets)
- Automatic zero EFC
- Other than nine-month enrollment

HEA Sec. 474–479

¹ Persons not required to file the IRS Form 1040 comprise those who do not have to submit a return, who filed or will file a 1040A or 1040EZ, and who were eligible to file a 1040A or 1040EZ but filed or will file a Form 1040 for no substantial reason or solely to claim an education tax credit.

For qualifying for the simplified formula or the automatic zero EFC, a foreign tax return counts as an IRS Form 1040, while a tax return for Puerto Rico, Guam, American Samoa, or the Virgin Islands counts as a Form 1040A or 1040EZ.

² See margin note #2 on the next page.

¹ See margin note #1 on the previous page.

² The means-tested federal benefit programs are:

- Medicaid (including the Children’s Health Insurance Program) or Supplemental Security Income (SSI)
- Supplemental Nutrition Assistance Program (SNAP) benefits, also known as food stamps
- Free and reduced price school lunches
- Temporary Assistance for Needy Families (TANF)
- Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)

A person need not have received the benefit for an entire year; receiving it at any time in the base or prior year qualifies. Also, an FAA may use professional judgment (PJ) to count a benefit if a person did not receive it during those 24 months but is receiving it now.

- either: (1) the student and spouse were not required to file an IRS Form 1040,¹ (2) one of them is a dislocated worker as defined in the Workforce Innovation and Opportunity Act, or (3) anyone counted in the household size received a means-tested federal benefit during 2017 or 2018.²

The fafsa.gov website has a threshold question that allows the asset questions to be skipped when the student seems eligible for the simplified formula or an automatic zero EFC. But in some instances, such as when using a paper FAFSA, a student who qualifies for the simplified formula will provide asset information. In those cases the CPS will calculate two EFCs: one using the assets and one excluding them. The EFC from the simplified formula (which excludes assets) is called the primary EFC and is printed on the front of the student’s SAR, while the EFC from the full calculation is called the secondary EFC and is printed in the FAA Information section. To determine the student’s federal aid, the school must use the primary EFC, which will always be less than or equal to the secondary EFC. If it turns out that the student was not eligible for the simplified formula and did not provide asset information, the school must correct and submit the record and use the EFC reported on the resulting transaction.

AUTOMATIC ZERO EFC

The law also provides for an automatic zero EFC for some students. The rules for determining who they are are the same as those for the simplified formula with these differences:

- The income threshold is \$26,000 or less instead of less than \$50,000.
- Independent students without dependents other than a spouse (those who use Formula B) do not qualify for an automatic zero EFC.

Automatic zero EFC

HEA Sec. 479(c)

DEPARTMENT OF DEFENSE MATCH AND IRAQ AND AFGHANISTAN SERVICE GRANT

Schools will consider the EFC to be zero for Pell-eligible students with a parent or guardian who was a member of the U.S. Armed Forces and who died as a result of service in Iraq or Afghanistan after September 11, 2001. These students must have been less than 24 years old or enrolled in college when the parent or guardian died.

The CPS will match applications against a file provided by the Department of Defense (DOD). If a match is found, a personalized letter will be sent to the student explaining the potential increase in funding, the DOD match flag will be set to “Y” on the ISIR, and a date will appear in the parent’s date of death field (which, out of sensitivity, will not be noted on the SAR). The CPS will calculate an EFC normally; the school should use a zero EFC when packaging qualifying students.

Students in this situation who are not Pell eligible because their EFC is too high will be able to receive an Iraq and Afghanistan service grant (see *Volume 1, Chapter 6*). The amount of the grant will be the same as that of

the Pell Grant they would have been eligible for with a zero EFC minus a set percentage (see *Chapter 3 of Volume 3* for specific guidance on calculating grant awards). However, for these students the school uses the EFC calculated by the CPS for packaging instead of zero.

ALTERNATE EFCs

The law specifies how the EFC of a dependent student must be modified if the student is going to enroll for other than a nine-month period. The EFC found in the upper right corner of the first page of the output document is based on a nine-month enrollment period and should always be used for awarding a Pell Grant, even if the student is attending for a longer or shorter period. The second section of the “FAA Information” area contains a table of alternate primary and secondary EFCs for periods of 1–12 months. These are alternate EFCs that you must use to award aid (other than Pell grants) if the student is attending for other than nine months.

THE EFC WORKSHEETS

The end of the chapter contains the EFC worksheets, which can be used to manually calculate an EFC or to see how the EFC is determined for each of the formulas explained hereafter. For items that are taken from the FAFSA, the worksheets indicate the corresponding FAFSA/SAR line numbers. On the worksheets for the simplified formula, the parts of the calculation that aren’t used are grayed out.

FORMULA A—DEPENDENT STUDENTS

The EFC for a dependent student is calculated using the FAFSA data for the student and his parents. The CPS calculates the parents’ contribution (which includes their assets), the student’s contribution from income, and the student’s contribution from assets; the EFC is the sum of these three.

Under the simplified formula, the parents’ contribution doesn’t include assets, nor is the student’s contribution from assets counted.

Parents’ contribution

The parents’ available income and contribution from assets are first determined, and then these are used with the number in college to calculate the parents’ contribution.

▼ *Parents’ available income.* The parents’ available income is calculated by subtracting certain allowances from the parents’ total income. These allowances account for certain nondiscretionary expenses, such as taxes and basic living expenses. Once a minimum level of support has been offset for those expenses, the formula assumes that the remaining income is available for discretionary purposes, including paying for a postsecondary education. The available income can be a negative number.

The total income is the sum of the taxable and untaxed income, minus amounts reported in the income but excluded from the formula. If the parents are tax filers, the parents’ AGI as reported on the FAFSA is the amount of the parents’ taxable income used in the calculation. If the parents are not

Negative AGI or zero?

The FAFSA asks for the AGI, which can be a negative number and which appears on a specific line of the tax return. If you are doing a hand calculation of the EFC, you’ll notice that the first line of the worksheet for Formula A cites the FAFSA line number and instructs you to substitute a zero if the AGI is negative. This does not mean that the student or parent should report a negative AGI as a zero on the FAFSA. The CPS will change the value to zero, and it makes assumptions that you will not make when completing an EFC worksheet by hand. When filling out the FAFSA, the applicant should use the AGI as it appears on the tax return, even if it is a negative number.

tax filers, the calculation uses the parents' reported income earned from work. Total income can be a negative number.

The sum of the following allowances reduces the parents' total income:

- **U.S. income tax paid.** Use the amount reported on the FAFSA. Non-tax filers don't receive this allowance. If this is a negative amount, it is set to zero.
- **State and other tax allowance.** Use Table A1. This allowance is a percentage of parents' total income and approximates the average amount paid in state and other taxes. The percentage varies according to the state and according to whether the parents' total income is below \$15,000 or is \$15,000 or more. The state used is the parents' state of legal residence reported on the FAFSA. If this item is blank or invalid, the student's reported state of legal residence is used. If both are blank or invalid, the state in the student's mailing address is used. If all three are blank or invalid, the rate shown in Table A1 for a blank or invalid state is used (3% for total income below \$15,000; 2% for total income of \$15,000 or more). If the allowance is a negative amount, it's set to zero.
- **Parents' Social Security tax allowance.** The parents' Social Security taxes are calculated separately by applying the rates shown in Table A2 to both parents' income earned from work in 2017 (as reported on the FAFSA). The total allowance for Social Security taxes is never less than zero.
- **Income protection allowance.** Use Table A3. This allowance is for the basic living expenses of a family. It varies according to the number in the parents' household and the number in college in 2019–2020, as reported on the FAFSA. In general, a school can assume that 30% of the income protection allowance amount is for food, 22% for housing, 9% for transportation expenses, 16% for clothing and personal care, 11% for medical care, and 12% for other family consumption. The income protection allowance used for a particular student is provided as one of the intermediate values in the FAA Information Section of the output document (labeled as "IPA").
- **Employment expense allowance.** Families with two working parents and one-parent families have extra expenses that must be considered, such as housekeeping services, transportation, clothing and upkeep, and meals away from home. This allowance recognizes those extra expenses. For two working parents, the allowance is 35% of the lesser of the first or second parent's income earned from work (questions 88 and 89), but may not exceed \$4,000. For one-parent families, the allowance is 35% of the parent's income earned from work, also not to exceed \$4,000. If a student's parents are married and only one parent reports an income earned from work, the allowance is zero. The employment expense allowance is never less than zero.

▼ *Parents' contribution from assets.* The full formula uses the assets of parents of a dependent student and determines a "contribution from assets." This amount is combined with available income to give an accurate picture of the family's financial strength. In the simplified formula assets aren't counted.

First, the parents' **net worth** is calculated by adding assets reported on the FAFSA. The net worth of a business or a farm is adjusted to protect a portion of these assets. Use Table A4 to calculate the amount to be used.

Second, the parents' **discretionary net worth** is calculated by subtracting the education savings and asset protection allowance (Table A5) from the parents' net worth. As with income, this is done to protect a portion of assets. The allowances for ages 40 through 65 approximate the present cost of an annuity that, when combined with Social Security benefits, would provide a moderate level of living for a retired couple or single person at age 65. As shown in Table A5, the allowance increases with the age of the older parent (as reported on the FAFSA) to indicate the cost of purchasing such an annuity at a given age. Discretionary net worth may be less than zero.

Finally, the discretionary net worth is multiplied by the conversion rate of 12% to get the **parents' contribution from assets**, which represents the portion of parental assets considered available to help pay for the student's college education. If the contribution from assets is negative, it is set to zero.

▼ *Calculation of parents' contribution.* This is the final step in determining the parents' contribution. The parents' available income and contribution from assets are added together to determine the parents' adjusted available income, which can be a negative number. The total parents' contribution from adjusted available income is calculated from the amounts and rates in Table A6 and is the total amount parents are expected to contribute toward all of their family's postsecondary educational costs. The rates in Table A6 increase from 22% to 47% as the adjusted available income increases. This is based on the principle that as income increases beyond the amount needed to maintain a basic standard of living, the portion used for family maintenance decreases and the portion available for discretionary purposes increases. Therefore, a progressively larger amount of income may be contributed toward postsecondary educational costs.

The parents' contribution for the individual student is calculated by dividing the total parents' contribution from adjusted available income by the number in college in 2019–2020, as reported on the FAFSA. Parents are not included in the number attending college.

Student's contribution from income

To determine the student's contribution from income, the student's available income (AI) is first calculated by subtracting total allowances from the student's total income. The AI is then assessed at a rate of 50% to obtain the student contribution from available income. If the student contribution from available income is less than zero, it's set to zero.

As with the parents' income information, the student's total income is calculated using information from his FAFSA. His total income is the sum of his taxable and untaxed income, minus amounts reported in the income but excluded from the formula (see *Chapter 2* for more on these exclusions). If the student is a tax filer, his AGI as reported on the FAFSA is the amount of taxable income used in the calculation. If he is not a tax filer, the calculation uses his reported income earned from work. The total income may be a negative number.

The allowances are calculated by adding the following:

- **U.S. income tax paid.** Use the amount reported on the FAFSA. Non-tax filers don't receive this allowance. If this is a negative amount, it's set to zero.
- **State and other tax allowance.** Use Table A7. This allowance is a percentage of the student's total income. The percentage varies according to the state. The state to be used is the student's state of legal residence reported on the FAFSA. If that item is blank or invalid, the state in the student's mailing address is used. If both items are blank or invalid, the parents' state of legal residence is used. If all three items are blank or invalid, the rate for a blank or invalid state in Table A7 is used (2%). If the allowance is a negative amount, it's set to zero.
- **Social Security tax allowance.** The student's Social Security taxes are calculated by applying the rates shown in Table A2 to the student's income earned from work in 2017 (as reported on the FAFSA). The total allowance for Social Security taxes is never less than zero.
- **Income protection allowance.** The income protection allowance for a dependent student is \$6,660.
- **Parent's negative AAI.** To recognize that a student's income may be needed to help support the family, the EFC calculation allows a parent's negative adjusted available income (AAI) to reduce a dependent student's contribution from income. Because the student's contribution from income cannot be negative, this will not affect the student's contribution from assets.

Student's contribution from assets

The student's assets are treated the same way as the parents' assets with three differences: there is no adjustment to the net worth of a business or farm, there is no education savings and asset protection allowance, and net worth is assessed at the rate of 20%. Remember that under the simplified formula there is no student contribution from assets.

The student's net worth is calculated by adding assets reported on the FAFSA (negative amounts are converted to zero for this calculation). The net worth is multiplied by 20% to obtain the student's contribution from assets, which is the portion of assets considered available to help pay for his postsecondary education.

Alternate EFCs for other than nine-month enrollment

The standard parents' contribution is for a nine-month enrollment period. For a shorter period, the parents' contribution is prorated according to the number of months of enrollment. The student's contribution from available income is also prorated and then added to the student asset contribution, which is not prorated. For an enrollment of more than nine months, the parents' contribution is calculated by adjusting the standard nine-month formula on page 3 of Worksheet A of the EFC worksheets, and the student's contribution remains at the nine-month amount.

FORMULA B—INDEPENDENT STUDENT WITHOUT DEPENDENTS OTHER THAN A SPOUSE

The EFC for an independent student without dependents other than a spouse is calculated using FAFSA data for the student and spouse. The CPS calculates a contribution from available income and a contribution from assets. The sum of these two is divided by the number in college in 2019–2020, as reported on the FAFSA. The result is the EFC for the 2019–2020 award year. Under the simplified formula, the contribution from assets isn't used.

Contribution from available income

The student's available income, which can be a negative number, is calculated by subtracting the total allowances from the total income. These allowances account for certain nondiscretionary expenses, such as taxes and basic living expenses. Once a minimum level of support has been provided to meet those expenses, the formula assumes that the remaining income is available for discretionary purposes, including paying for a postsecondary education. The available income is then assessed at a rate of 50% to obtain the student's contribution from available income.

▼ **Total income.** The total income is the sum of the student's and her spouse's (if the student is married) taxable and untaxed income, minus amounts reported in the income on the FAFSA but excluded from the formula (see *Chapter 2* for more on these exclusions). If the student and spouse are tax filers, their AGI as reported on the FAFSA is the amount of taxable income used in the calculation. If they are not tax filers, the calculation uses reported income earned from work. Untaxed income is included in the formula because it may have a considerable effect on the family's financial strength and, in some cases, may be the family's main source of income. The total income can be a negative number.

▼ **Allowances against income.** Total allowances are calculated by adding the following:

- **U.S. income tax paid.** Use the amount reported on the FAFSA. Non-tax filers don't receive this allowance. If this is a negative amount, it's set to zero.
- **State and other tax allowance.** Use Table B1. This allowance is a percentage of the student and spouse's total income. The percentage varies according to the state. The state to be used is the student's state of legal residence reported on the FAFSA. If that item is blank or invalid, the state in the student's mailing address is used. If both items are blank or invalid, the rate for a blank or invalid state is used (2%). If the allowance is a negative amount, it's set to zero.
- **Social Security tax allowance.** The student and spouse's Social Security taxes are calculated separately by applying the tax rates shown in Table B2 to the student's and spouse's income earned from work in 2017 (as reported on the FAFSA). The total allowance for Social Security taxes is never less than zero.

- **Income protection allowance.** The income protection allowance is \$10,360 for single students and for married students whose spouse is enrolled at least half time. The allowance is \$16,620 for married students whose spouse isn't enrolled at least half time.
- **Employment expense allowance.** Families with two working spouses have extra expenses that must be considered, such as house-keeping services, transportation, clothing and upkeep, and meals away from home. This allowance recognizes those extra expenses. If the student isn't married, the employment expense allowance is zero. If the student is married but only one person is working (either the student or the student's spouse), the allowance is zero. If both the student and his spouse are working, the allowance is 35% of the lesser of the student's income earned from work (Question 39) or the spouse's income earned from work (Question 40), but it may not exceed \$4,000.

Contribution from assets

For students who qualify for the simplified formula, there is no contribution from assets. In the full formula, the assets of an independent student with no dependents other than a spouse are considered in order to fully measure the family's ability to contribute toward postsecondary educational costs.

First, the **net worth** of the student and spouse's assets is calculated by adding assets reported on the FAFSA. The net worth of a business or a farm is adjusted to protect a portion of the net worth of these assets. Use Table B3 to calculate the amount to be used.

Second, the student and spouse's **discretionary net worth** is calculated by subtracting the asset protection allowance (Table B4) from the net worth. The allowance increases with the age of the student as of December 31, 2019, which may be determined from the student's date of birth as reported on the FAFSA. This is done to protect a portion of assets that may be needed for purposes other than education, such as emergencies or retirement. Discretionary net worth can be less than zero.

Finally, the discretionary net worth is multiplied by the conversion rate of 20% to obtain the student and spouse's contribution from assets, which represents the portion of the value of the assets that is considered available to help pay for the student's college education. If the contribution from assets is less than zero, it's set to zero.

Alternate EFCs for other than nine-month enrollment

The standard EFC is for a nine-month enrollment period. If the student will be enrolled for less than nine months, the EFC is simply prorated by dividing it by nine and then multiplying the result by the number of months the student will be enrolled. For an enrollment of more than nine months, however, the EFC remains at the nine-month amount.

FORMULA C—INDEPENDENT STUDENT WITH DEPENDENTS OTHER THAN A SPOUSE

The EFC for an independent student with dependents other than a spouse is calculated using the information for the student and spouse provided on the FAFSA. The formula is almost the same as the formula for the parents of a dependent student. There are three basic steps. First, the student's available income is determined. Then, the student's contribution from assets is calculated. Finally, the EFC is calculated using the available income, the contribution from assets, and the number in college.

Available income

Available income is calculated by subtracting allowances from the student's total income. These allowances account for certain nondiscretionary costs, such as taxes and basic living expenses, and represent a minimum level of support. The formula assumes that the remaining income is available for discretionary purposes, including paying for a postsecondary education. The available income can be a negative number.

▼ *Student's total income.* The student's total income is the sum of the student's and his spouse's (if the student is married) taxable and untaxed income, minus amounts reported in the income on the FAFSA but excluded from the formula (see *Chapter 2* for more information on these exclusions). If the student and spouse are tax filers, AGI as reported on the FAFSA is the amount of taxable income used in the calculation. If they are not tax filers, the calculation uses reported income earned from work. The total income can be a negative number.

▼ *Allowances against income.* Total allowances are calculated by adding the following:

- **U.S. income tax paid.** Use the amount reported on the FAFSA. Non-tax filers don't receive this allowance. If this is a negative amount, it is set to zero.
- **State and other tax allowance.** Use Table C1. This allowance is a percentage of the total income and approximates the average amount paid in state and other taxes. The percentage varies according to the state and according to whether the total income is below \$15,000 or is \$15,000 or more. The state to be used is the student's state of legal residence reported on the FAFSA. If this item is blank or invalid, the state in the student's mailing address is used. If both items are blank or invalid, the rate for a blank or invalid state is used (3% for total income below \$15,000; 2% for total income of \$15,000 or more). If the allowance is a negative amount, it's set to zero.
- **Social Security tax allowance.** The student's and spouse's Social Security taxes are calculated separately by applying the tax rates shown in Table C2 to the student's income earned from work and the spouse's income earned from work in 2017 (as reported on the FAFSA). The total allowance for Social Security taxes is never less than zero.

- **Income protection allowance.** Use Table C3. This allowance provides for the basic living expenses of a family. It varies according to the number in the student’s household and the number in college in 2019–2020, as reported on the FAFSA. In general, a school can assume that 30% of the income protection allowance is for food, 22% for housing, 9% for transportation expenses, 16% for clothing and personal care, 11% for medical care, and 12% for other family consumption. The income protection allowance used for a particular student is provided as one of the intermediate values in the FAA Information Section of the output document (labeled as “IPA”).
- **Employment expense allowance.** Families with two working parents and one-parent families have extra expenses that must be considered, such as housekeeping services, transportation, clothing and upkeep, and meals away from home. This allowance recognizes those extra expenses. When both the student and spouse work, the allowance is 35% of the lesser of the student’s income earned from work (Question 39) or the spouse’s income earned from work (Question 40), but may not exceed \$4,000. If the student isn’t married, the allowance is 35% of the student’s income earned from work, or \$4,000, whichever is less. If a student is married and only the student *or* the spouse (but not both) reports an income earned from work, the allowance is zero. The employment expense allowance is never less than zero.

Contribution from assets

In the full formula, the assets of an independent student with dependents other than a spouse are considered in order to fully measure the family’s ability to contribute toward postsecondary educational costs. The formula determines a “contribution from assets,” an amount that is combined with available income to give an accurate picture of the family’s financial strength. In the simplified formula, the assets aren’t counted at all.

First, the **net worth** of a student and spouse’s assets is calculated by adding assets reported on the FAFSA. The net worth of a business or farm is adjusted to protect a portion of these assets. Use Table C4 to calculate the amount to be used.

Second, the student and spouse’s **discretionary net worth** is calculated by subtracting the asset protection allowance (Table C5) from the net worth. The allowance increases with the age of the student as of December 31, 2019, which may be determined from the student’s date of birth as reported on the FAFSA. This is done to protect a portion of assets that may be needed for purposes other than education, such as emergencies or retirement. Discretionary net worth can be less than zero.

Finally, the discretionary net worth is multiplied by 7% to obtain the **contribution from assets**, which is the portion of the value of the student’s and spouse’s assets considered to be available to help pay for the student’s postsecondary education. If the contribution from assets is less than zero, it is set to zero.

Calculation of student's EFC

This is the final step in determining the EFC for the independent student with dependents other than a spouse. The available income and the contribution from assets are added together to obtain the adjusted available income. The adjusted available income can be a negative number. The total contribution from adjusted available income is calculated from using Table C6. This is the total amount the student's family is expected to contribute toward family postsecondary educational costs. The rates in Table C6 increase from 22% to 47% as the adjusted available income increases. The rate is based on the principle that as income increases beyond the amount needed to maintain a basic standard of living, the portion used for family maintenance decreases, while the portion available for discretionary purposes increases. The larger the income, the easier it is for a family to contribute toward postsecondary educational costs with less effect on the maintenance of the family.

Dividing the total student's contribution from adjusted available income by the number in college, as reported on the FAFSA, yields the EFC for the 2019–2020 award year.

Alternate EFCs for other than nine-month enrollment

The standard EFC is for a nine-month enrollment period. If the student will be enrolled for less than nine months, the EFC is simply prorated by dividing it by nine and then multiplying the result by the number of months the student will be enrolled. For an enrollment of more than nine months, however, the EFC remains at the nine-month amount.

2019–2020 EFC FORMULA A: DEPENDENT STUDENT

PARENTS' INCOME IN 2017	
1. Parents' adjusted gross income (FAFSA/SAR #85) If negative, enter zero.	
2. a. Parent 1 (father/mother/stepparent) income earned from work (FAFSA/SAR #88)	
2. b. Parent 2 (father/mother/stepparent) income earned from work (FAFSA/SAR #89) +	
Total parents' income earned from work	=
3. Taxable income (If tax filers, enter the amount from line 1 above. If non-tax filers, enter the amount from line 2.)*	
4. Total untaxed income and benefits: (total of FAFSA/SAR #94a through 94i) +	
5. Taxable and untaxed income (sum of line 3 and line 4)	=
6. Total additional financial information (total of FAFSA/SAR #93a through 93f) -	
7. TOTAL INCOME (line 5 minus line 6) May be a negative number.	=

ALLOWANCES AGAINST PARENTS' INCOME	
8. 2017 U.S. income tax paid (FAFSA/SAR #86) (tax filers only) If negative, enter zero.	
9. State and other tax allowance (Table A1) If negative, enter zero.	+

**Table A1: State and Other Tax Allowance
for EFC Formula A Worksheet (parents only)**

State	Percent of Total Income		State	Percent of Total Income	
	\$0 - \$14,999	\$15,000 or more		\$0 - \$14,999	\$15,000 or more
Alabama	3%	2%	Montana	5%	4%
Alaska	2%	1%	Nebraska	5%	4%
American Samoa	3%	2%	Nevada	2%	1%
Arizona	4%	3%	New Hampshire	4%	3%
Arkansas	4%	3%	New Jersey	9%	8%
California	8%	7%	New Mexico	3%	2%
Canada and Canadian Provinces	3%	2%	New York	9%	8%
Colorado	4%	3%	North Carolina	5%	4%
Connecticut	9%	8%	North Dakota	2%	1%
Delaware	5%	4%	Northern Mariana Islands	3%	2%
District of Columbia	7%	6%	Ohio	5%	4%
Federated States of Micronesia	3%	2%	Oklahoma	3%	2%
Florida	3%	2%	Oregon	7%	6%
Georgia	5%	4%	Palau	3%	2%
Guam	3%	2%	Pennsylvania	5%	4%
Hawaii	5%	4%	Puerto Rico	3%	2%
Idaho	5%	4%	Rhode Island	6%	5%
Illinois	5%	4%	South Carolina	4%	3%
Indiana	4%	3%	South Dakota	2%	1%
Iowa	5%	4%	Tennessee	2%	1%
Kansas	4%	3%	Texas	3%	2%
Kentucky	5%	4%	Utah	5%	4%
Louisiana	3%	2%	Vermont	6%	5%
Maine	6%	5%	Virgin Islands	3%	2%
Marshall Islands	3%	2%	Virginia	6%	5%
Maryland	8%	7%	Washington	3%	2%
Massachusetts	7%	6%	West Virginia	3%	2%
Mexico	3%	2%	Wisconsin	6%	5%
Michigan	4%	3%	Wyoming	2%	1%
Minnesota	6%	5%	Blank or Invalid State	3%	2%
Mississippi	3%	2%	Other	3%	2%
Missouri	4%	3%			

To calculate the state and other tax allowance (EFC Formula A Worksheet, line 9), multiply the parents' total income (EFC Formula A Worksheet, line 7) by the appropriate percentage from the table above. Use the parents' state of legal residence (FAFSA/SAR #70). If this item is blank or invalid, use the student's state of legal residence (FAFSA/SAR #18). If both items are blank or invalid, use the state in the student's mailing address (FAFSA/SAR #6). If all three items are blank or invalid, use the percentage for a blank or invalid state above.

Table A2: Social Security Tax

Income Earned from Work*	Social Security Tax
\$0 – \$127,200	7.65% of income
\$127,201 or greater	\$9,730.80 + 1.45% of amount over \$127,200

*Calculate separately the Social Security tax of parent 1, parent 2, and the student.

Parent 1 (father/mother/stepparent) 2017 income earned from work is FAFSA/SAR #88.
 Parent 2 (father/mother/stepparent) 2017 income earned from work is FAFSA/SAR #89.
 Student’s 2017 income earned from work is FAFSA/SAR#39.
 Social Security tax will never be less than zero.

Table A3: Income Protection Allowance

Number in parents’ household, including student (FAFSA/SAR #73)	Number of college students in the household (FAFSA/SAR #74)				
	1	2	3	4	5
2	\$18,580	\$15,400	not applicable	not applicable	not applicable
3	\$23,140	\$19,980	\$16,800	not applicable	not applicable
4	\$28,580	\$25,400	\$22,240	\$19,060	not applicable
5	\$33,720	\$30,540	\$27,380	\$24,200	\$21,040
6	\$39,430	\$36,260	\$33,100	\$29,920	\$26,760

Note: For each additional household member, add \$4,450.
 For each additional college student (except parents), subtract \$3,160.

**Table A4: Business/Farm Net Worth Adjustment
for EFC Formula A Worksheet (parents only)**

If the net worth of a business or farm is—	Then the adjusted net worth is—
Less than \$1	\$0
\$1 to \$130,000	40% of net worth of business/farm
\$130,001 to \$395,000	\$52,000 + 50% of net worth over \$130,000
\$395,001 to \$660,000	\$184,500 + 60% of net worth over \$395,000
\$660,001 or more	\$343,500 + 100% of net worth over \$660,000

**Table A5: Parents' Education Savings and Asset Protection Allowance
for EFC Formula A Worksheet (parents only)**

<i>Age of older parent as of 12/31/2019*</i>	<i>Allowance if there are two parents**</i>	<i>Allowance if there is only one parent</i>	<i>Age of older parent as of 12/31/2019*</i>	<i>Allowance if there are two parents**</i>	<i>Allowance if there is only one parent</i>
25 or less	\$0	\$0	46	\$11,400	\$6,000
26	700	300	47	11,600	6,100
27	1,300	700	48	11,900	6,200
28	2,000	1,000	49	12,200	6,400
29	2,600	1,400	50	12,500	6,500
30	3,300	1,700	51	12,900	6,700
31	4,000	2,100	52	13,200	6,800
32	4,600	2,400	53	13,500	7,000
33	5,300	2,800	54	13,900	7,200
34	5,900	3,100	55	14,300	7,300
35	6,600	3,500	56	14,700	7,500
36	7,300	3,800	57	15,100	7,700
37	7,900	4,200	58	15,500	7,900
38	8,600	4,500	59	15,900	8,100
39	9,200	4,900	60	16,400	8,300
40	9,900	5,200	61	16,800	8,500
41	10,100	5,300	62	17,300	8,800
42	10,400	5,500	63	17,800	9,000
43	10,600	5,600	64	18,300	9,200
44	10,900	5,700	65 or older	18,900	9,500
45	11,100	5,800			

* Determine the age of the older parent listed in FAFSA/SAR #64 and #68 as of 12/31/2019. If no parent date of birth is provided, use age 45.

** Use the two parent allowance when the parents' marital status listed in FAFSA/SAR #59 is "Married or remarried" or "Unmarried and both legal parents living together."

Table A6: Parents' Contribution from AAI

If the parents' AAI is —	Then the parents' contribution from AAI is—
Less than -\$3,409	-\$750
-\$3,409 to \$16,600	22% of AAI
\$16,601 to \$20,800	\$3,652 + 25% of AAI over \$16,600
\$20,801 to \$25,100	\$4,702 + 29% of AAI over \$20,800
\$25,101 to \$29,300	\$5,949 + 34% of AAI over \$25,100
\$29,301 to \$33,600	\$7,377 + 40% of AAI over \$29,300
\$33,601 or more	\$9,097 + 47% of AAI over \$33,600

Mississippi	2%	Other	2%
Missouri	3%		

To calculate the state and other tax allowance (EFC Formula A Worksheet, line 37), multiply the student's total income (EFC Formula A Worksheet, line 35) by the appropriate percentage from the table above. Use the student's state of legal residence (FAFSA/SAR #18). If this item is blank or invalid, use the state in the student's mailing address (FAFSA/SAR #6). If both items are blank or invalid, use the parents' state of legal residence (FAFSA/SAR #70). If all three items are blank or invalid, use the percentage for a blank or invalid state above.

Maryland	6%	Washington	1%
Massachusetts	4%	West Virginia	3%
Mexico	2%	Wisconsin	4%
Michigan	3%	Wyoming	1%
Minnesota	5%	Blank or Invalid State	2%
Mississippi	2%	Other	2%
Missouri	3%		

To calculate the state and other tax allowance (EFC Formula B Worksheet, line 9), multiply the total income of the student and spouse (EFC Formula B Worksheet, line 7) by the appropriate percentage from the table above. Use the student's state of legal residence (FAFSA/SAR #18). If this item is blank or invalid, use the state in the student's mailing address (FAFSA/SAR #6). If both items are blank or invalid, use the percentage rate for a blank or invalid state above.

Table B2: Social Security Tax

Income Earned from Work*	Social Security Tax
\$0 – \$127,200	7.65% of income
\$127,201 or greater	\$9,730.80 + 1.45% of amount over \$127,200

***Calculate separately the Social Security tax of the student and spouse.**

Student's 2017 income earned from work is FAFSA/SAR #39.
Spouse's 2017 income earned from work is FAFSA/SAR #40.
Social Security tax will never be less than zero.

Table B3: Business/Farm Net Worth Adjustment

If the net worth of a business or farm is—	Then the adjusted net worth is—
Less than \$1	\$0
\$1 to \$130,000	40% of net worth of business/farm
\$130,001 to \$395,000	\$52,000 + 50% of net worth over \$130,000
\$395,001 to \$660,000	\$184,500 + 60% of net worth over \$395,000
\$660,001 or more	\$343,500 + 100% of net worth over \$660,000

Table B4: Asset Protection Allowance

<i>Age of Student as of 12/31/2019*</i>	<i>Allowance for Married Student</i>	<i>Allowance for Unmarried Student</i>	<i>Age of Student as of 12/31/2019*</i>	<i>Allowance for Married Student</i>	<i>Allowance for Unmarried Student</i>
25 or less	\$0	\$0	46	\$11,400	\$6,000
26	700	300	47	11,600	6,100
27	1,300	700	48	11,900	6,200
28	2,000	1,000	49	12,200	6,400
29	2,600	1,400	50	12,500	6,500
30	3,300	1,700	51	12,900	6,700
31	4,000	2,100	52	13,200	6,800
32	4,600	2,400	53	13,500	7,000
33	5,300	2,800	54	13,900	7,200
34	5,900	3,100	55	14,300	7,300
35	6,600	3,500	56	14,700	7,500
36	7,300	3,800	57	15,100	7,700
37	7,900	4,200	58	15,500	7,900
38	8,600	4,500	59	15,900	8,100
39	9,200	4,900	60	16,400	8,300
40	9,900	5,200	61	16,800	8,500
41	10,100	5,300	62	17,300	8,800
42	10,400	5,500	63	17,800	9,000
43	10,600	5,600	64	18,300	9,200
44	10,900	5,700	65 or older	18,900	9,500
45	11,100	5,800			

* Determine the student's age as of 12/31/2019 from the student's date of birth (FAFSA/SAR #9).

To calculate the state and other tax allowance (EFC Formula C Worksheet, line 9), multiply the total income of the student and spouse (EFC Formula C Worksheet, line 7) by the appropriate percentage from the table above. Use the student's state of legal residence (FAFSA/SAR #18). If this item is blank or invalid, use the state in the student's mailing address (FAFSA/SAR #6). If both items are blank or invalid, use the percentage for a blank or invalid state above.

Table C2: Social Security Tax

Income Earned from Work*	Social Security Tax
\$0 – \$127,200	7.65% of income
\$127,201 or greater	\$9,730.80 + 1.45% of amount over \$127,200

*Calculate separately the Social Security tax of the student and spouse.

Student’s 2017 income earned from work is FAFSA/SAR #39.
 Spouse’s 2017 income earned from work is FAFSA/SAR #40.
 Social Security tax will never be less than zero.

Table C3: Income Protection Allowance

Number in student’s household, including student (FAFSA/SAR #95)	Number of college students in the household (FAFSA/SAR #96)				
	1	2	3	4	5
2	\$26,250	\$21,760	not applicable	not applicable	not applicable
3	\$32,680	\$28,2010	\$23,730	not applicable	not applicable
4	\$40,360	\$35,880	\$31,410	\$26,920	not applicable
5	\$47,620	\$43,120	\$38,660	\$34,180	\$29,710
6	\$55,690	\$51,210	\$46,750	\$42,240	\$37,790

Note: For each additional household member, add \$6,290.
 For each additional college student, subtract \$4,470.

Table C4: Business/Farm Net Worth Adjustment

If the net worth of a business or farm is—	Then the adjusted net worth is—
Less than \$1	\$0
\$1 to \$130,000	40% of net worth of business/farm
\$130,001 to \$395,000	\$52,000 + 50% of net worth over \$130,000
\$395,001 to \$660,000	\$184,500 + 60% of net worth over \$395,000
\$660,001 or more	\$343,500 + 100% of net worth over \$660,000

Table C5: Asset Protection Allowance

<i>Age of Student as of 12/31/2019*</i>	<i>Allowance for Married Student</i>	<i>Allowance for Unmarried Student</i>	<i>Age of Student as of 12/31/2019*</i>	<i>Allowance for Married Student</i>	<i>Allowance for Unmarried Student</i>
25 or less	\$0	\$0	46	\$11,400	\$6,000
26	700	300	47	11,600	6,100
27	1,300	700	48	11,900	6,200
28	2,000	1,000	49	12,200	6,400
29	2,600	1,400	50	12,500	6,500
30	3,300	1,700	51	12,900	6,700
31	4,000	2,100	52	13,200	6,800
32	4,600	2,400	53	13,500	7,000
33	5,300	2,800	54	13,900	7,200
34	5,900	3,100	55	14,300	7,300
35	6,600	3,500	56	14,700	7,500
36	7,300	3,800	57	15,100	7,700
37	7,900	4,200	58	15,500	7,900
38	8,600	4,500	59	15,900	8,100
39	9,200	4,900	60	16,400	8,300
40	9,900	5,200	61	16,800	8,500
41	10,100	5,300	62	17,300	8,800
42	10,400	5,500	63	17,800	9,000
43	10,600	5,600	64	18,300	9,200
44	10,900	5,700	65 or older	18,900	9,500
45	11,100	5,800			

* Determine the student's age as of 12/31/2019 from the student's date of birth (FAFSA/SAR #9)

Table C6: Student's Contribution from AAI

If the student's AAI is—	Then the student's contribution from AAI is—
Less than -\$3,409	-\$750
\$-3,409 to \$16,600	22% of AAI
\$16,601 to \$20,800	\$3,652 + 25% of AAI over \$16,600
\$20,801 to \$25,100	\$4,702 + 29% of AAI over \$20,800
\$25,101 to \$29,300	\$5,949 + 34% of AAI over \$25,100
\$29,301 to \$33,600	\$7,377 + 40% of AAI over \$29,300
\$33,601 or more	\$9,097 + 47% of AAI over \$33,600
