

Determining the Loan Period and Amounts

The rules for awarding Stafford and PLUS loans are a little different than for Pell Grants and other SFA programs. In particular, the definitions of a “loan period” and the disbursements within that period may not always fit the academic year and payment period measurement used for Pell. Proration is required for a program (or the remaining portion of a program) shorter than an academic year, but the calculation is different than in other programs.

DETERMINING THE LOAN PERIOD

It’s important to define the period of enrollment or loan period at the outset, because the length of the loan period will determine the amount and frequency of disbursements. If your school uses academic terms, (such as academic year, semester, trimester, quarter or nonstandard term), the loan period must coincide with one or more of its academic terms. Loan periods for schools that do not use terms are generally based on the length of the program or academic year.

For programs using terms and credit hours, the **minimum** loan period is a single academic term. As an example, if a student enrolls in a fall semester to complete his/her requirements for graduation, you may certify a loan for that term alone. (Remember, however, that the loan amount must be based on costs and EFC for that term, rather than for the full academic year.)

For a clock-hour school or a credit-hour school that does not use terms, the **minimum** period for which the school may certify a loan is the shortest of the following three periods:

- the academic year as defined by the school (but no less than 30 weeks of instruction providing 900 clock hours, 24 semester hours, or 36 quarter hours);
- the length of the student’s program at the school (see sidebar on minimum program length); or
- the remaining portion of the student’s program that exceeds the school’s academic year.

In the case of a student who has already completed some of the coursework to earn a degree or certificate (e.g. a transfer student or a student who is re-enrolling after withdrawing), you may certify the loan for the remaining period of study at your school.

Minimum and Maximum Loan Periods

Maximum = generally school’s academic year but not more than 12 months.

Minimum (term/credit hour program) = one academic term

Minimum (clock hour or non-term program) = lesser of academic year, program length, or remaining portion of academic year

Minimum Program Length

Minimum program lengths are discussed in Volume 2 of the Handbook. For purposes of the FFEL/DL programs, a program at a proprietary school or a postsecondary vocational school must include at least 10 weeks of instruction providing at least 300 clock hours, 8 semester hours, or 12 quarter hours.

Scheduled Academic Year Example — Term Program

The Springfield Academy also offers a two-year program measured in semesters and awarding credit hours. It defines its academic year as two smesters providing 30 weeks of instruction. Springfield has Fall, Spring, and Summer sessions, but most of its students do not attend the summer session. Therefore, Springfield Academy uses a Scheduled Academic Year that starts September 7 and concludes May 21 and certifies most loans for that period of enrollment.

The **maximum** loan period is generally the school’s academic year but cannot exceed a 12-month period. It is possible, but not typical, to have more than one loan in an academic year.

ACADEMIC YEAR

As we’ve seen, the loan period is often measured in terms of an academic year. Briefly, an academic year is a period that contains at least 30 weeks of instructional time during which a full-time student is expected to complete at least 24 semester or trimester hours or 36 quarter hours at a school measuring program length in credit hours, or at least 900 clock hours at a school measuring program length in clock hours. Volume 2 of the *SFA Handbook: Institutional Eligibility and Participation* includes a more detailed treatment of the academic year for the SFA programs.

Scheduled Academic Year

Only used for programs using credit hours and terms.

Academic Year = 2 Semesters

1st pp	2nd pp
Fall	Spring

Academic Year = 3 Quarters

1st pp	2nd pp	3rd pp
Fall	Winter	Spring

The academic year is also used when determining the student’s annual loan limits. The annual limit for Stafford Loans is based on an academic year rather than a calendar award year. Once the student has reached the annual loan limit, he or she cannot receive another Stafford Loan until he or she begins another academic year.

Two types of academic year for loans

There are two types of academic years a school can use in determining when another year will begin for the student: a scheduled academic year (SAY) or a borrower-based academic year (BBAY). Clock-hour and nonterm credit-hour programs *must* use borrower-based academic years. Only term-based credit-hour programs can use SAYs. However, you may elect to use a borrower-based academic year for a term-based credit-hour program if the program’s academic year provides at least 30 weeks of instruction (unless the Department grants a waiver for an academic year of less than 30 weeks).

For a term-based credit-hour program, the school can use BBAYs for all its students or just for students enrolled in certain programs, or it may use BBAYs on a student-by-student basis. The school can even alternate BBAYs with SAYs for a student, but the academic years must not overlap. A school that has these choices for academic year standards must have a written policy that explains how it applies these options when calculating loan eligibility.

Scheduled Academic Year

An SAY is a fixed period of time that generally begins and ends at the same time each calendar year (for example, beginning on the first day of the fall semester and ending on the last day of the spring semester). The SAY generally corresponds to the academic year or calendar that is published in the school’s catalog or other materials. An SAY must meet the statutory requirements of an academic year, as described in the *SFA Handbook: Institutional Eligibility and Participation*.

Borrower-based Academic Year

As noted previously, a school must use BBAYs for clock-hour and nonterm credit-hour programs; the school may use either type of academic year for term-based credit-hour programs where the academic year provides at least 30 weeks of instruction.

A BBAY is not a fixed period of calendar time like an SAY; instead, the BBAY's beginning and end dates depend on an individual student's enrollment and progress. For example, a school that has new students beginning enrollment every month would use a BBAY for each student that begins in the month the student enrolls, rather than using an SAY that begins in the fall regardless of when the student actually begins classes. Like an SAY, the BBAY must meet the minimum statutory requirements for an academic year (unless the Department grants a waiver term-based credit-hour programs.)

In a program using terms and credit hours, the BBAY must include the same number of terms as the SAY the school would otherwise use (not including any summer session as a "trailer" or "header"). The BBAY may include terms and/or mini-sessions the student does not attend if the student could have enrolled **at least half time** in those terms or mini-sessions; however, unlike an SAY, the BBAY must begin with a term in which the student actually enrolled. Also, any mini-sessions (summer or otherwise) that run consecutively **must** be combined and treated as a single term. If the BBAY includes a summer term, the BBAY need not meet the 30-week minimum requirement for an academic year.

For a clock-hour or nonterm program, the BBAY begins when the student enrolls. Because the BBAY must meet the minimum statutory requirements for an academic year, the BBAY must contain at least 30 weeks of instructional time and the appropriate number of credit or clock hours (24 semester or trimester hours, 36 quarter hours, or 900 clock hours). The BBAY does not end until the student has completed the number of weeks **and** the number of hours in the academic year. A student who is attending less-than-full-time will take longer to complete the academic year than a full-time student.

Treatment of summer terms & "crossover periods"

For a program that uses SAYs, a summer term may be part of the academic year that preceded that term (that is, it may be a "trailer"), or it may be part of the academic year that follows that term (that is, it may be a "header"). For FFEL/DL purposes, a school can establish a policy that designates its summer term as either a trailer or header, or it can make different designations for different educational programs.

You may also designate the summer term as a trailer or header for each student on a case-by-case basis. However, if a student in a summer school session that overlaps two award years is also receiving campus-based aid, you must use the same EFC (from the same application year) for both the campus-based aid and the FFEL/DL loan.

Borrower Based Academic Year

Example — Nonterm

Springfield Academy has a 1,350-clock-hour program, and defines its academic year as 900 clock hours and 30 weeks. An enrolling student may receive two Federal Stafford Loans during the program (provided all eligibility criteria are met) because the program exceeds one academic year. The period of enrollment for the first loan would be the time it will take the student to complete 900 clock hours. The period for the second loan would be the time it takes to complete the remaining 450 hours. Note that the student cannot receive the second loan until he/she has completed the first 900 hours of the program AND 30 weeks have elapsed.

Other BBAY Term Examples

Can also be used by credit-hour term programs—especially in cases where a student is enrolling in a different sequence of terms than the Scheduled Academic Year for that program.

Academic Year = 2 Semesters

Spring	Summer

1st pp	not enrolled	2nd pp
Spring	Summer	Fall

Academic Year = 3 Quarters

1st pp	2nd pp	3rd pp
Spring	Summer	Fall

Annual and Aggregate Loan Limits

See *34 CFR 682.204 and 685.203*;
Dear Colleague letter GEN 97-3

Dependent Undergraduate Student Example

Jen, a first-year dependent student at Reid State U., applies for a Stafford Loan to attend a term beginning in September. Her COA is \$12,000, and, based on her need, she qualifies for a subsidized Stafford Loan of \$2,000. She may also apply for an unsubsidized Stafford Loan of \$625, which is the difference between the amount of her subsidized Stafford Loan (\$2,000) and the Stafford Loan limit (\$2,625) for a first-year undergraduate. Her parents may borrow a PLUS Loan to cover the remainder of the COA.

The choice of the application year to be used for need analysis purposes can be different than the designation of the term as a header or trailer for purposes of establishing the academic year for the loan. For instance, you may have a policy that treats the summer term for 2001 as a header to the academic year for the loan, but you may make an exception and use the EFC from the 2000-2001 FAFSA.

Summer mini-sessions can be grouped together as a single trailer or header, or they can be treated separately and assigned to different SAYs. If the summer mini-sessions are grouped and treated as a single term, the summer cost of attendance cannot include costs for a mini-session for which the student was not enrolled.

Additional loan eligibility in the same academic year

In general, once a student has reached the annual loan limit, he or she cannot receive another Stafford Loan until he or she begins a new academic year. A student who has already received one Stafford Loan within an academic year may receive additional loan funds if he or she has not yet reached the annual limit. In addition, a student who has already borrowed up to the annual limit within an academic year can receive additional loan funds if the annual limit increases, either because the student progresses to a grade level with a higher limit or because his or her dependency status changes to independent. In all cases, the student may borrow the difference between the amount already borrowed within the academic year and the student's loan limit. Usually, the increase in the loan amount can be made as an adjustment to the student's existing loan rather than making a new loan.

Note that for a nonterm program, the student will never progress to a higher grade level within an academic year and, thus, will only have a change in the loan limit if his or her dependency status changes. The student moves to a higher grade level only when he or she completes the BBAY.

ANNUAL LOAN LIMITS

Stafford Loan Limit for Dependent undergraduates

A dependent student enrolled in a program of study that is at least an academic year in length may borrow combined subsidized and unsubsidized loans not to exceed an annual total of

- up to \$2,625 for a *first-year student*,
- up to \$3,500 for a *second-year student*,
- up to \$ 5,500 for a *third-, fourth-, or fifth-year undergraduate*, or a student who already has an associate or baccalaureate degree and who is enrolled in an undergraduate program that requires an associate or baccalaureate degree for admission.

These loan limits represent the total of all subsidized and unsubsidized Stafford Loans a dependent undergraduate student may borrow at each level of study. A dependent undergraduate student who takes out both subsidized and unsubsidized Stafford Loans must not exceed the annual and aggregate limits allowed under the Stafford Loan Program. An unsubsidized Stafford Loan amount, subject to the loan limits described above, is the difference between the borrower's COA for the loan period and the borrower's EFA (including any subsidized Stafford Loan amount he or she will receive).

A student's academic year level for loan limit purposes is set according to the school's standards for the time normally required to complete a given grade level. However, if the school determines a program normally can be completed in two years of full-time study, a student in that program can never receive more than the second-year annual loan limit of \$3,500 in any given year, no matter how long it takes the student to finish.

Stafford Loan limit for independent undergraduates & others without access to PLUS

Independent undergraduate students may borrow unsubsidized loans with additional loan limits. The additional loan limits also apply to dependent undergraduate students whose parents are unable to borrow PLUS loans due to exceptional circumstances. The regulations give several examples of possible exceptional circumstances affecting the parents' ability to borrow—adverse credit history, incarceration, income limited to public assistance and disability benefits. Another exceptional circumstance might be if the parent's whereabouts are unknown. However, a parent's refusal to take out a PLUS loan does not constitute an exceptional circumstance.

The following unsubsidized loan limits may be added to the borrower's combined subsidized and unsubsidized loan limits. An independent undergraduate student enrolled in a program of study that is at least an academic year in length may borrow additional unsubsidized loan amounts not to exceed an annual total of

- up to \$4,000 for a *first-year* or *second-year student*,
- up to \$5,000 for a *third-, fourth-, or fifth-year undergraduate*, or a student who has an associate or bachelors degree that is required for admission into a program and who is not a graduate or professional student.

For instance, an independent student in the second year of study would be eligible to borrow a total of \$7,500 in subsidized and unsubsidized loans.

For any loan period that begins on or after July 1, 2000, a school may not award additional unsubsidized loan funds to a dependent student based on the school's decision not to participate in the PLUS program.

Independent undergraduates and others without access to PLUS
FFEL—see 34 CFR 682.204(d)
and 34 CFR 682.201(a)(3)
DL—see 685.203(c)

Independent Undergraduate Student Example

Dottie is a first-year independent undergraduate student at Ferrar's Institute. Her COA is \$9,500. Dottie qualifies for a subsidized Stafford Loan of \$1,500. She may apply for an unsubsidized Stafford Loan of \$5,125 (\$1,125 remaining under her initial Stafford Loan limit, plus a \$4,000 unsubsidized Stafford Loan). Her total loan limit for her subsidized Stafford Loan and her unsubsidized Stafford Loan is \$6,625.

Graduate and Professional Limits

See 34 CFR 682.204(a)(5), (c)(5) and 685.203(a)(5), (c)(2)(v)

PLUS Loan Limits

See 34 CFR 682.204(h) and 685.203(f)

Stafford Loan Proration

See 34 CFR 682.204(a), (d) and 685.203(a), (c)

When and When Not to Prorate

You must prorate a Stafford Loan if the student is enrolled in a program less than an academic year in length, or if the remaining term(s) of the program are less than an academic year.

Stafford Loan Limit for Graduate and Professional Students (Stafford Loans)

The subsidized loan limit for a graduate or professional student is \$8,500 per academic year. The additional unsubsidized loan limit for graduate or professional students is \$10,000 per academic year.

Stafford Loan limits for coursework required for teacher certification/other programs

For students enrolled for no longer than one consecutive 12-month period in a course of study necessary for enrollment in:

- an undergraduate degree or certificate program, annual loan limits are \$2,625 for subsidized Stafford loans and \$4,000 additional in unsubsidized Stafford loans.
- a graduate or professional degree or certification program (for students with baccalaureate degrees), annual loan limits are \$5,500 for subsidized Stafford loans and \$5,000 additional in unsubsidized Stafford loans.

For students who have baccalaureate degrees and are completing coursework necessary for a professional credential or teacher certification (certification from a state that is required for employment as a teacher), the annual loan limits are \$5,500 in subsidized Stafford loans and \$5,000 additional in unsubsidized Stafford loans.

PLUS loan limits

A PLUS Loan may not exceed the student’s estimated COA minus other financial aid awarded during the period of enrollment. This is the only borrowing limit for PLUS Loans.

Proration Example for Clock Hour Program Less Than Academic Year

Jill is a dependent student enrolled in a 12-week program at Frederick Career College. FCC defines the academic year for this program as 900 clock hours providing 30 weeks of instruction. Measured in clock hours, Jill’s program is 400 clock hours long.

400hrs 12 wks	Academic year=900 hrs/30 wks
------------------	------------------------------

To determine the maximum loan amount she can borrow, convert the fractions based on weeks ($12/30 = .40$) and hours ($400/900 = .44$) to decimals. Multiply the smaller decimal (.40) by the first-year annual loan limit: $\$2,625 \times .40 = \$1,050$.

The maximum combined subsidized and unsubsidized loan amount Jill can borrow for the program is \$1,050.

PRORATED ANNUAL LOAN LIMITS FOR STAFFORD LOANS

Generally, a dependent or independent undergraduate may borrow up to the annual limit applicable to the student’s year in school. However, the maximum amount an undergraduate student may borrow must be prorated, in certain situations. **PLUS Loans and loans for graduate or professional students are not subject to proration.**

There are two situations where you must prorate the annual limit for subsidized and unsubsidized Stafford loans:

- when a borrower is enrolled in a program that is shorter than a full academic year, and
- when a borrower is enrolled in a program that is one academic year or more in length, but is in a remaining period of study that is shorter than a full academic year. (The remaining period must be at least as long as the minimum loan period given at the beginning of this chapter.)

If a student drops or adds a course after you have originated a prorated loan, you **may** readjust the loan amount but you are not required to do so. Of course, a student who drops courses must still be enrolled **at least half time** to be eligible for any loan amount.

Prorating loans for programs of study shorter than a full academic year

When a student is enrolled in an academic program that is shorter than a full academic year in length, you must use a proportional proration that is based on the *lesser* of —

$$\frac{\text{Number of semester, trimester, quarter or clock Hours Enrolled}}{\text{Number of semester, trimester, quarter or clock Hours in the Academic Year}}$$

or

$$\frac{\text{Number of Weeks Enrolled}}{\text{Number of Weeks in the Academic Year}}$$

Schools may express the resulting fraction as a decimal to see more easily which is less or to calculate the prorated limit. The smaller fraction is then multiplied by the appropriate annual loan limit. The result is the prorated loan limit for the student.

Please bear in mind that the proration does not necessarily affect the amount of the loan. For instance, if a student's prorated loan limit is \$2,100, but the student was only eligible for a \$2,000 subsidized Stafford Loan based on costs, EFC, and other aid, then the proration would not affect the amount of the **subsidized** Stafford loan.

Prorating loans for remaining periods of study shorter than an academic year

You must also prorate loans for students enrolled in remaining periods of study shorter than an academic year. This situation arises when a student is enrolled in a program that is one academic year or more in length, but is in a remaining period of study that is shorter than an academic year.

Proportional proration is used in all cases of remaining periods of study less than a full academic year (see definition below) and is always based on:

$$\frac{\text{Number of semester, trimester, quarter or clock Hours Enrolled}}{\text{Number of semester, trimester, quarter or clock Hours in the Academic Year}}$$

This fraction is multiplied by the appropriate annual loan limit to determine the prorated loan limit. There is no comparison of weeks and hours. Hours are always used.

Proration Example for Credit Hr Program < Academic Yr
Morgan is an independent student enrolled in a program at Frederick Career College that provides 24 quarter hours and 20 weeks of instruction. FCC defines the academic year for this program as 36 quarter hours providing 30 weeks of instruction.

Program = 24 quarter hrs
Annual Limit = \$2,625
Prorated Limit = \$1,759

Program = 24 hrs		
Academic year = 36 credit hrs		

To determine the maximum loan amount she can borrow, convert the fractions based on weeks ($20/30 = .67$) and quarter hours ($24/36 = .67$) to decimals. Multiply the smaller decimal (in this case, both are .67) by the first-year annual loan limits for subsidized and unsubsidized Stafford:

$\$6,625 \times .67 = \$4,439$ total Stafford
 $\$2,625 \times .67 = \$1,759$ subsidized

The maximum combined subsidized and unsubsidized Stafford amount Morgan can borrow for the program is \$4,439, with the subsidized loan amount limited to \$1,759.

Proration Example for Remaining Period < Academic Yr
Rudy has attended 6 quarters in a 2-year program at Beulah Community College, but to finish the program, he needs to attend an additional quarter as a half-time student. Rudy is a dependent undergraduate student, and BCC defines its academic year as 30 weeks and 24 semester hours.

Remaining period of study:
Annual Stafford limit = \$3500

Fall	Winter	Spring
Academic year = 3 Quarters		

To determine the basic prorated subsidized/unsubsidized loan amount, convert the fraction based on hours ($1/3 = .33$) to decimals. Multiply this decimal by the second-year undergraduate annual loan limit: $\$3,500 \times .33 = \$1,155$.

Proration Example for Remaining Period with Separated Terms

O'Donnell Institute has an academic year that consists of three quarters: fall, winter, and spring. Rosie will be enrolling in the fall and spring quarters, but not the winter quarter, and will graduate at the end of the spring quarter.

1st pp	not enrolled	3rd pp
Fall	Winter	Spring

Because the fall quarter is in the same academic year as Rosie's final quarter, it is part of the final period of study, even though there is a term between the final quarter and the fall quarter in which she will not enroll. Because the fall quarter is part of the final period of study, the loan Rosie receives in the fall must be prorated, just as her spring loan must be prorated.

Note on fractions and decimals for pro-rating Stafford loans

It is acceptable for schools to convert the fraction to a decimal and then multiply the annual loan limit by the decimal, but they are not required to do so. Schools may still choose to multiply the annual loan limit by the original fraction. However, they should be consistent in the method they use, since the fraction and decimal calculations sometimes result in slightly different prorated loan limits. (The decimal method will generally - if not always - result in an amount that is equal to or slightly higher than the amount calculated using the original fraction.)

Aggregate Loan Limits

See 34 CFR 682.204(b), (e) and 685.203(d), (e)

Note that the Higher Education Amendments of 1998 provide that interest capitalized on unsubsidized Stafford Loans shall not be counted against the borrower's aggregate loan limits.

At a **term-based credit hour** school (where the academic year is measured in semesters, trimesters, quarters, or other terms), a remaining period of study is considered shorter than an academic year if the remaining period consists of fewer terms than the school's scheduled academic year. For example, a student might have completed two academic years of study at a community college, and have received two Stafford Loans, but need to attend an additional quarter term to complete his/her program requirements. That final quarter term would fall in a new academic year, and would have to be prorated, since it is a remaining period of study that is less than a full academic year. Terms within the same academic year as the student's final term are considered part of the final period of study, even if separated from the final term by a term in which the student is not enrolled.

At a **term-based clock hour** school (where the academic year is measured in semesters, trimesters, quarters, or other terms), a remaining period of study is considered shorter than an academic year if the final period consists of fewer terms than the school's scheduled academic year **or** fewer clock hours than the minimum statutory requirements for a full academic year. As with credit-hour terms, all terms within the same academic year are considered part of the final period of study, even if separated from the final term by a term in which the student is not enrolled.

At a **nonterm** school (where programs are measured only in clock or credit hours), a remaining period of study is considered less than an academic year if the remaining period consists of fewer clock or credit hours than the minimum statutory requirements for a full academic year.

AGGREGATE LOAN LIMITS

The maximum outstanding **total subsidized and unsubsidized** Stafford Loan debt is:

- \$23,000 for a dependent undergraduate student,
- \$46,000 for an independent undergraduate student (or a dependent undergraduate student whose parents do not qualify for PLUS loans). No more than \$23,000 of this aggregate amount may be in the form of subsidized loans.
- \$138,500 for a graduate or professional student (including loans for undergraduate study). No more than \$65,500 of this aggregate amount may be in the form of subsidized loans.

If the student has borrowed Stafford Loans at other schools, the National Student Loan Data System is the best source of information on the student's current outstanding principal balance. The outstanding principal balance reflects the original amount of loan principle (including the loan fees, but not including any

Annual Limits for Stafford Loans

	<i>Subsidized</i>	<i>Total (subsidized & unsubsidized)</i>
<i>Dependent Undergraduates</i>		
First Year	\$ 2,625	SAME
Second Year	\$ 3,500	SAME
Third Year and Beyond	\$ 5,500	SAME
 <i>Independent Undergraduates & Others Without Access to PLUS</i>		
First Year	\$ 2,625	\$ 6,625
Second Year	\$ 3,500	\$ 7,500
Third Year and Beyond	\$ 5,500	\$ 10,500
 <i>Graduate & Professional Students</i>		
All Years of Study	\$ 8,500	\$ 18,500

Note: All undergraduate annual loan amounts are subject to proration.

Aggregate Limits for Stafford Loans

	<i>Subsidized</i>	<i>Total (subsidized & unsubsidized)</i>
<i>Dependent Undergraduates</i>	\$ 23,000	SAME
 <i>Independent Undergraduates & Others Without Access to PLUS</i>	 \$ 23,000	 \$ 46,000
 <i>Graduate & Professional Students</i>	 \$ 65,500	 \$ 138,500

Note: Certain health professions students may qualify for higher annual & aggregate limits—see discussion at end of this chapter.

capitalized interest that was added later), minus the amount of loan payments that have been credited against the principal.

These maximums include any amounts borrowed under the Direct Loan and FFEL programs (including Consolidation Loans). Any outstanding Federal Supplemental Loans for Students (SLS) that a borrower has count as unsubsidized loans against the borrower's aggregate loan limit.

If a student who previously received undergraduate and graduate degrees returns to school to complete a second undergraduate program, only the loans that the student received for the first undergraduate program are included in determining the student's remaining loan eligibility for the second undergraduate program. If the total amount received for the first undergraduate program does not exceed the undergraduate aggregate loan limits, the student may receive additional funds for the second program, up to the undergraduate aggregate limits.

Although loans received for graduate study are not counted toward a student's undergraduate aggregate loan limit, the combined loan amounts received for undergraduate and graduate programs may not exceed the total allowable aggregate loan limits.

A borrower who has reached his or her aggregate borrowing limit may not receive additional loans. Once the loans are repaid, in full or in part, the borrower may apply for additional Stafford Loans.

Example: Combining Undergraduate and Graduate Subsidized/Unsubsidized Loan Limits

An independent student received the following loan amounts for a first undergraduate program and a graduate program:

	First undergraduate program:	Graduate program:	Total:
subsidized	\$20,500	\$45,000	\$65,500
unsubsidized	\$10,000	\$40,000	\$50,000

The student has now enrolled in a second undergraduate program. Only the loans received for the first undergraduate program are counted toward the student's *undergraduate* aggregate loan limit. Since the total amount received for the first undergraduate program (\$30,500) does not exceed the aggregate loan limit for an independent undergraduate (\$46,000, maximum \$23,000 subsidized), the student has remaining loan eligibility of up to \$15,500 for the second undergraduate program.

However, the loans received for the graduate program must be considered in determining whether the student has exceeded the *total* aggregate loan limits. In this case, the total subsidized amount already received (\$65,500) is the maximum subsidized amount that a student may receive for undergraduate and graduate study combined. Therefore, the student may receive only unsubsidized loans for the second undergraduate program.

Increased Eligibility for Health Profession Students

The Health Education Assistance Loan (HEAL) Program, a loan program for health professions students administered by the Department of Health and Human Services, was gradually phased out beginning in 1995. The phaseout has now been completed, and no further HEAL Program loans are being made. To replace loan funds that otherwise would have been available under the HEAL Program, certain health professions students may borrow increased unsubsidized Stafford loan amounts.

With the complete phaseout of HEAL, the Department has removed the earlier restrictions that limited participation to schools that had disbursed HEAL loans in fiscal year 1995 and to students who, as of October 1, 1995, were not HEAL borrowers.

Increased Unsubsidized Amounts for Health Professions Students

For any loan period beginning on or after May 1, 1999, schools may award the increased unsubsidized amounts to students who are enrolled full-time in a health professions discipline that (1) was eligible under the HEAL Program and (2) is accredited by an approved accrediting agency. (See "Dear Partner" Letter GEN-99-21.) The disciplines that were eligible under the HEAL Program and the approved accrediting agencies for these disciplines are shown in the loan limit chart on the next page for the increased unsubsidized amounts.

While the HEAL Program required a need analysis test, the EFC is not used to determine need for unsubsidized Stafford Loans.

Increased Annual Loan Limits

Because the increased annual unsubsidized Stafford loan limits are intended to replace funds that would have been available previously under the HEAL Program, the annual loan limits for the increased unsubsidized amounts are the same as the HEAL Program annual loan limits. The chart on the next page shows the annual loan limits for the increased unsubsidized amounts, which vary by discipline and academic year (AY) length, as well as the approved accrediting agency for each discipline.

Increased Aggregate Loan Limits

Graduate and Professional. The combined subsidized/unsubsidized aggregate loan limit for graduate and professional health professions students who are eligible to receive the increased unsubsidized amounts is \$189,125 (not more than \$65,500 of this amount may be in subsidized loans).

This increased aggregate loan limit would permit a student to receive the current maximum Stafford annual loan limits for four years of undergraduate study ($\$6,625 + \$7,500 + \$10,500 + \$10,500$) and four years of graduate/professional study ($\$18,500 \times 4$), plus the maximum increased unsubsidized loan limit for a 9-month academic year for four years of graduate/professional study ($\$20,000 \times 4$).

Undergraduate. The combined subsidized/unsubsidized aggregate loan limit for undergraduate health profession students (Bachelor of Science in Pharmacology) who are eligible to receive the increased unsubsidized amounts is \$70,625 (not more than \$23,000 of this amount may be in subsidized loans).

This increased aggregate loan limit would permit a student to receive the current maximum Stafford annual loan limits for five years of undergraduate study ($\$6,625 + \$7,500 + \$10,500 + \$10,500 + \$10,500$), plus the maximum increased unsubsidized loan limit for a 9-month academic year for the fourth and fifth years of undergraduate study ($\$12,500 \times 2$).

Programs Eligible for:

Additional \$20,000 in Unsubsidized Loans for a 9-month Academic Year
Additional \$26,667 in Unsubsidized Loans for a 12-month Academic Year

Doctor of Allopathic Medicine	Accreditation: Liaison Committee on Medical Education)
Doctor of Osteopathic Medicine	Accreditation: American Osteopathic Association, Bureau of Professional Education
Doctor of Dentistry	Accreditation: American Dental Association, Commission on Dental Accreditation
Doctor of Veterinary Medicine	Accreditation: American Veterinary Medical Association, Council on Education
Doctor of Optometry	Accreditation: American Optometric Association, Council on Optometric Education
Doctor of Podiatric Medicine	Accreditation: American Podiatric Medical Association, Council on Podiatric Medical Education

Additional \$12,500 in Unsubsidized Loans for a 9-month Academic Year
Additional \$16,667 in Unsubsidized Loans for a 12-month Academic Year

Master of Science in Pharmacology (and 4th/5th Yr. Bachelor's)*	Accreditation: American Council on Pharmaceutical Education
Graduate in Public Health	Accreditation: Council on Education for Public Health
Doctor of Chiropractic	Accreditation: Council on Chiropractic Education, Commission on Accreditation
Doctoral Degree in Clinical Psychology	Accreditation: American Psychological Association, Committee on Accreditation
Masters or Doctoral Degree in Health Administration	Accreditation: Accrediting Commission on Education for Health Services Administration

EXAMPLE OF ANNUAL LOAN LIMIT: The increased unsubsidized amounts that an eligible health professions student may receive are in addition to the regular Stafford annual loan limits. For example, a student enrolled in a 9-month Doctor of Dentistry program is eligible for the regular Stafford subsidized/unsubsidized annual loan maximum for a graduate/professional student (\$18,500, not more than \$8,500 of which may be subsidized), plus the maximum increased unsubsidized amount of \$20,000, for a total Stafford loan maximum of \$38,500.

* There is only one undergraduate program (Bachelor of Science in Pharmacology) that was eligible under the HEAL Program. In accordance with HEAL Program rules, a student enrolled in a Bachelor of Science in Pharmacology program may receive the increased unsubsidized amounts only for the fourth and fifth years of the program. In addition (consistent with regular Title IV requirements), a dependent undergraduate may receive the increased unsubsidized amounts only if the student's parent is unable to borrow a PLUS loan.
