## What's in Volume 4, Record Layouts and Processing Codes?

This volume of the *FAFSA Processing Specifications Guide* provides the record layouts you need to create your own software to participate in the Electronic Data Exchange (EDE) process. It also provides tables of codes, messages, and data specifications to assist you in defining your system, submitting your data, and correcting errors or *Free Application for Federal Student Aid* (FAFSA®) data, as well as other processing codes associated with the FAFSA Processing System (FPS) EDE process.

**Important Note:** The FAFSA Simplification Act and the FUTURE Act require an unprecedented update to how students and families apply for student aid and how eligibility is determined, giving students a better and simpler experience with the FAFSA. Given the unprecedented complexity of the new FAFSA, the dates in this volume reflect the last day possible for anticipated release based on our current projections.

There may be additional changes as Federal Student Aid continues its development and clearance process of the 2024–25 FAFSA form. Additional updates will be provided as available with a final layout scheduled later this year.

# Record Layouts

## ISIR Record Layout

**Important Note:** In the FPS system all numeric fields are left justified and are no longer zero-filled to fill the full length of the field. For example, a 7-character field with a “-123” value; in FPS the ISIR value would populate as “-123.” Whereas, in 2023–24 and prior cycles, negative values use a signed numeric character and are zero-filled to the field length “000012C”.

**New for this draft!** The Changes column describes changes since the September 2023 draft was posted.

# Processing Codes

---

## Overview

The Processing Codes section of this volume includes data specifications to assist you in defining your system and correcting FAFSA data, as well as other processing codes associated with the FPS EDE process. These codes include:

- **ISIR Cross-Reference**

Typically, we provide an ISIR cross-reference table that compares the ISIR field number, start position, and end position with the prior year information and lists the field values (for each field) that have changed from the last award year. Because of the amount of change this cycle we will not produce this table, but you should expect to have something similar for the 2025-26 award year.

- **State Codes**

Use the codes in this table to determine the valid state abbreviations used for the following fields, which are found in various record layouts in this volume:

- Mailing State
- State of Legal Residence
- High School Diploma State
- State-recognized High School Equivalent State

- **Country Codes**

The Country Code is part of the FAFSA contact information for the student, student's spouse, parent, and parent's spouse.

- **NSLDS® Loan Program Codes**

Use the codes in this table to identify loan program types sent by the National Student Loan Data System (NSLDS®) on ISIRs. These codes are described in the six NSLDS Loan Type Code fields in the ISIR record layout.

- **NSLDS® Loan Status Codes**

Use the codes in this table to determine the current loan status information sent by NSLDS on the ISIR. These codes are described in the six NSLDS Loan Current Status fields in the ISIR record layout.

- Federal Loan Servicer Loan Servicing Codes
- Federal Loan Servicers
- FFEL-only Servicers
- Guaranty Agencies
- FFEL Lenders
- Contact Information & Fields Associated with Loan Status
- Correction Data Entry Specifications

You can use this table in conjunction with the Correction Record Layout found earlier in this volume. This table defines the valid field content for all correctable FPS fields.

Data is sent using left justification without adding with leading zeros in numeric values. For example, a nine-digit field would be submitted as follows:

- \$1,234 would be sent as “1234” rather than “000001234”
- -\$5,678 would be sent as “-5678” rather than “-000005678”

- Field Name and Position Cross-References

# State Codes

There are four questions that include a state code. Use the table below to determine which codes are valid for the following state questions:

- Mailing State
- State of Legal Residence
- High School Diploma State
- State-recognized High School Equivalent State

**Table 4-4: State Codes**

## FFEL Lenders

To find the lender's code, name, city, and state, use the NSLDS Professional Access website at [nsldsfa.ed.gov](https://nsldsfa.ed.gov). Users can filter by type "Lender," then select "Retrieve" to display a list of all lenders in the database in alphabetical order. Users can also narrow down the list by entering the organization code or name before selecting "Retrieve."

## Correction Data Entry Specifications

You can use this table in conjunction with the Correction Record Layout found earlier in this volume. This table defines the valid field content for all correctable FPS fields. It includes the EDE number, field length, justification, and valid data to send for each field on a correction record. The table also indicates the FAFSA question number.

Use the EDE # as the EDE Field # in the Correction Export Record Layout, which is found in the Record Layouts earlier in this volume. Adhere to the Valid Field Content values for the EDE # in the Valid Field Content for the corresponding Field Data field.
