

**Download My Aid Data
File Layout**

Oct. 31, 2022

Introduction

The Download My Aid Data option on [StudentAid.gov](https://studentaid.gov) allows students to download information about their *Title IV* aid which includes loans, grants, overpayments, subsidized usage, enrollment, and contact information into a machine-readable, plain text file. Download My Aid Data is available from the “My Aid” page on [StudentAid.gov](https://studentaid.gov).

Note: The source of the aid data is the National Student Loan Data System (NSLDS®). This functionality was previously named “MyStudentData Download” and was available on the NSLDS Student Access website before it was retired.

Students who select the Download My Aid Data link receive, as a download, a machine-readable file in American Standard Code for Information Interchange (ASCII) format. The simple text file includes their loan information (e.g., loan amount, disbursement amount), grant information (e.g., award amount, disbursement amount), as well as enrollment and overpayment information.

To assist software vendors with designing new tools for students to maximize the usefulness of the data, we have developed the *Download My Aid Data File Layout*. This document defines the layout of the file that students can download from [StudentAid.gov](https://studentaid.gov).

NSLDS Download My Aid Data File Layout

The Download My Aid Data file is made up of name:value pairs separated by colons. Each name:value pair occupies a new line of the file. Individual pairs do not occur in fixed positions, as they would in a fixed-length flat file or a formatted report, and they are not tagged to identify their nature or cardinality, as they would be in an eXtensible Markup Language (XML) file. This is because there is no way to specify in advance how many loans, grants, aid overpayments, or program enrollment records each student may have, or how many disbursements or statuses each loan may have.

However, pairs will always occur in the same order within the various subsections of the file. A student's first name, if she has one, will always occur before her middle initial and last name. The status for an individual loan will always occur before the status description or status effective date. The combination of position and name should allow users or third-party software vendors to identify the contents of each name:value pair.

The relationships between the different parts of the download file can be expressed in tabular form as follows.

Root	Has	Has	Has	
File	1 Student	0-24 Loan Type Totals		
		0-50 Loans	1-50 Statuses	
			0-25 Disbursements	
			0-10 Discharge	
			0-50 Consolidation	
			0-3 Contacts	
			0-1 Special Contacts	
		0-40 Grants	0-1 Contacts	
		0-10 Aid Overpayments	0-1 Contacts	
			0-1 Special Contacts	
		0-300 Programs	0-300 Statuses	
		0-50 Awards		
		0-50 Current Enrollments		
		0-50 New Enrollments		
0-50 Authorizations				

An example created from the Download My Aid Data output using this file layout is provided in Appendix A.

The layouts that follow identify position, name, and format for each value. The lengths of both name and value fields are variable.
