Chapter 1: Overview

1.1 Introduction

Volume 2 of the *NSLDS Financial Value Transparency and Gainful Employment (FVT/GE) User Guide* focuses on the reporting of program information to the National Student Loan Data System (NSLDS®).

Schools can choose to report program-specific information through batch reporting via the Student Aid Internet Gateway (SAIG), through online reporting, or the spreadsheet submittal process via the NSLDS Professional Access website. Depending on your school's preferred method, managing the reporting process may require a combination of batch and online access. Please refer to the *Introduction* for instructions on how sign up for FVT/GE Batch Services or online access.

NSLDS batch reporting supports both the fixed-width and comma-separated values (CSV) formats, providing versatility to meet your school's technical requirements and preferences.

This program submittal reporting volume provides schools with details on the descriptions for the FVT/GE Program Batch Submittal File, along with information on the header and trailer details, file formats, data elements, and definitions. This volume also provides the error codes used for the FVT/GE Program Batch Submittal File and their descriptions, as well as detail about the FVT/GE Program File-Level Error File and the FVT/GE Program Error Acknowledgment File. Further information within this volume explains how schools can report FVT/GE program data using both online reporting and the spreadsheet submittal process via the NSLDS Professional Access website.

1.2 Reporting Requirements

The FVT/GE regulations require that schools annually report data (student- and program-specific) to NSLDS for programs at the institution (six-digit OPEID) level. The deadline to report 2024 FVT/GE data is January 15, 2025. All subsequent FVT/GE reporting will be due by October 1st, after the most recently completed award year. This volume will detail the procedures for schools to submit program-specific information to NSLDS. Reporting includes information about each GE or Eligible Non-GE Program at your institution on an annual basis for the most recently completed award year. Schools must report specific information for each GE or Eligible Non-GE Program.

GE Programs and Eligible Non-GE Programs are identified by a combination of an institution's six-digit OPEID number, the program's six-digit Classification of Instructional Programs (CIP) code as assigned by the institution or determined by the Secretary, and the program's credential level (e.g., associate's degree or bachelor's

degree). A GE Program or an Eligible Non-GE Program could include multiple *Title IV*-eligible programs, as defined under 34 CFR 668.8, if the institution offers multiple distinct programs that have the same six-digit CIP code and credential level. There are also some *Title IV*-eligible programs that are neither GE nor Eligible Non-GE Programs. They are not subject to reporting or any other requirements in the FVT/GE regulations.

Table 1: Neither GE nor Eligible Non-GE Programs

These programs do not need to be reported as they are neither GE nor Eligible Non-GE Programs
Approved Comprehensive Transition and Postsecondary (CTP) Programs
Approved Prison Education Programs
Postbaccalaureate Teacher Certification Programs where the institution does not award a credential
Programs at least two academic years in length that are acceptable for full credit toward a bachelor's degree (these are programs that do not lead to a credential)
Preparatory coursework for which eligible students may receive Direct Loan funds

Refer to [GEN-24-04 Regulatory Requirements for Financial Value Transparency and Gainful Employment](#) for more information.

Accuracy in reporting is crucial for schools, as some information provided will be verified against information already stored in NSLDS. This process ensures the Department can generate an accurate Completers List for schools and calculate accurate debt-to-earnings (D/E) rates and earnings premium (EP) measures for the program. The Completers List process and the calculation process will be detailed in future volumes of the *NSLDS FVT/GE User Guide*.

Chapter 2: FVT/GE Program Submittal File

Schools will have various options to submit FVT/GE program-specific data to NSLDS, including the FVT/GE Batch Program Submittal File via SAIG and online reporting functions through the NSLDS Professional Access website. This section will detail how schools can submit their program-specific data through the FVT/GE Batch Program Submittal File via SAIG.

Figure 1 provides the reporting periods and deadlines to report program data to NSLDS for current and future years. The Reporting Period is the period of time for which the school is reporting data.

Figure 1: Reporting Periods and Deadlines

Schools should report FVT/GE program-specific information to the Department on an annual basis. Schools are required to report FVT/GE program data to NSLDS for any program within a group of substantially similar programs containing at least 30 completers within the four most recently completed award years who received Title IV aid to attend the program. . A group of substantially similar programs is defined as all programs in the same four-digit CIP code at an institution.

The Program Submittal file allows schools to submit program data such as the accrediting agency name, whether the program is a qualifying graduate program or a Liberal Arts Program at a proprietary school, the total number of enrolled students in that program, and so forth. The FVT/GE Program Submittal File should only contain program-level data at the 6-digit OPEID level.

2.1 FVT/GE Batch Processing

Schools may submit an FVT/GE Program Submittal file to NSLDS via SAIG using one of the batch file layouts described in Appendix A. After receiving the FVT/GE Program Submittal File, NSLDS will perform validation checks for any file-level errors. If any errors are found, NSLDS will not process the submittal file and return a File-Level Error File to the school. An FVT/GE Program File-Level Error File would typically be returned if there are format issues or issues in the Header or Trailer record. If no File-Level errors are found, the FVT/GE Program Error/Acknowledgment File will be sent to schools for each processed FVT/GE Program Submittal File. This file will only list the first error on a record submitted that triggered the issue. If there are no errors, the FVT/GE Program Error/Acknowledgment file will contain only a Header and Trailer record.

After a school corrects any errors in their FVT/GE Program Submittal File as indicated by either the FVT/GE Program File-Level Error File or the FVT/GE Program Error/Acknowledgment File, the school is then able to resubmit the corrected file to NSLDS.

2.1.1 FVT/GE Program Submittal File Information

The FVT/GE Program Submittal File is the file schools are required to submit to report FVT/GE program data to NSLDS. Institutions must provide program information for each eligible *Title IV* program that has a total of at least 30 completers over the four most recently completed award years within any group of substantially similar programs. Substantially similar is defined as all programs in the same four-digit CIP code at an institution.

The program submittal file contains one Header record, one or more Detail Records, and one Trailer Record.

Table 2 displays the data that must be included when submitting the FVT/GE Program Submittal file Detail Record ('01') to NSLDS. Schools should report this information annually but can report it more frequently.

Table 2: FVT/GE Program Submittal File Detail Record (01)

Count of Program Graduates who Passed Licensure Exam
State Two/Three/Four/Five in MSA of Main Campus
Program Prepares Students for Licensure in MSA State Two/Three/Four/Five
Invalid Flag

Additional details on the definitions of these fields can be found in Appendix A below.

Schools can also utilize the Program Submittal File to either update or invalidate a previously submitted FVT/GE record. Schools need to make sure that the values they are reporting (to update or invalidate the existing FVT/GE record) match the information stored with the current record on NSLDS. The following are the fields that must match between the current and existing records:

- Award Year
- CIP Code
- Credential Level
- Published Length of Program
- Published Length of Program Measurement
- Weeks in *Title IV* Academic Award Year

If a match is found and the Invalid Flag field is a ‘Y’, NSLDS will invalidate the existing record that it was matched to. If the Invalid flag field is ‘N’ or space, NSLDS will process and update the existing record.

Figures 2 and 3 provide an example of the FVT/GE Program Submittal File. Please note that the images below illustrate different portions of the FVT/GE Program Submittal File: Figure 2 displays positions 1-84, while Figure 3 displays positions 113-255.

Enrollment data from NSLDS and the information provided by schools in the submittal file will be utilized to draft the Completers List and calculate the program’s debt-to-earnings (D/E) and earnings premium (EP) measure. The Completers List process and the calculation process will be detailed in future volumes of the *NSLDS FVT/GE User Guide*.

2.1.2 Qualifying Graduate Program Information

A Qualifying Graduate Program is a program in certain fields for which required postgraduation training requirements apply for licensure. It is a recognition that certain graduate programs, mostly concentrated in medical and clinical fields, are associated with an initial period of depressed graduate earnings while graduates complete a required period of postgraduate clinical or residency work necessary to obtain a professional licensure, after which graduates realize significant earnings growth. The program must be one whose students must complete a “required postgraduation training program” to obtain licensure, which is a supervised training program that (1) requires the student to hold a degree in one of the qualifying fields and (2) must be completed before the student may be licensed by a State and board certified for professional practice or service. Refer to GEN-24-04 Regulatory Requirements for Financial Value Transparency and Gainful Employment for more information.

NSLDS considers a program to be a qualifying graduate program when:

- The program was identified on the [List of Approved Classification of Instructional Program \(CIP\) Codes for Qualifying Graduate Programs](#), published by the Department, as being potentially eligible to be considered a qualified graduate program, and
- Via the FVT/GE Program Submittal File, the school attested that at least half of the program’s graduates obtain licensure in a state where postgraduation training requirements apply, and if necessary for licensure, the program is accredited by an accrediting agency that meets state requirements

When a school indicates a ‘Y’ in the Qualifying Graduate Program Indicator field to attest that the program is eligible as a qualifying graduate program, NSLDS verifies its

2.3 FVT/GE Program Error/Acknowledgement File

The FVT/GE Program Error/Acknowledgement File is returned to schools by NSLDS after the FVT/GE Program Submittal File is submitted and it passes all validation checks for any file-level errors. This file will only list the first error on a record submitted that triggered the issue. If there are no errors, the FVT/GE Program Error/Acknowledgment file will contain only a Header and Trailer record.

Note: As of this publication, the FVT/GE Program Error/Acknowledgement file will only display one error. However, in the future, the file will display up to five errors.

Figure 6 is an example of an FVT/GE Program Error/Acknowledgement File (fixed-width format) if there are no record-level errors present in the FVT/GE Program Submittal File.

2.4 Batch File Formats

Multiple file formats are available for the purpose of FVT/GE reporting. NSLDS will support the use of the fixed-width format and the comma separated values (CSV) format. These formats utilize the same data, but the format varies slightly.

2.4.1 FVT/GE Program Submittal File

The following description outlines the basics of the fixed-width or comma separated values (CSV) FVT/GE Program Submittal File.

The following outlines the basics of the fixed-width or comma separated values (CSV) Submittal file.

- **Header Record** – Each FVT/GE Program file contains a single Header record. The Header record identifies the source of the file and the file's preparation/creation date, as well as other identifying information.
- **Detail Records** – Each FVT/GE file may contain one or more Detail Records. Each program should be submitted in its own Detail Record (01).
- **Trailer Record** – Each FVT/GE Program File contains a single Trailer Record to correspond to the Header Record included in the file. The Trailer Record shows the total number of Detail Records contained in the file.

Format Data – All records must be formatted according to the record layout and field definitions in Appendix A. Verify data and check for formatting errors before submitting a file to NSLDS.

2.4.2 FVT/GE Program File-Level Error File

The following outlines the basics of the fixed-width or comma separated values (CSV) FVT/GE Program File-Level Error File.

- **Header, Detail, and Trailer Record** – Each FVT/GE Program File-Level Error File contains one Header record, one Detail Record '01' with one error code at the end of the record, and one Trailer record. The Header record identifies the source of the file and the date the file-level error was generated, as well as other identifying information. Detail Record '01' contains all spaces and zeros, except for the Error Code 1 field which will identify the file level error present in the FVT/GE Program Submittal File. The Trailer record will show the Detail Record count of one.

Descriptions of the File-Level Error Codes are provided in Appendix A.

2.4.3 FVT/GE Program Error/Acknowledgement File

The following outlines the basics of the fixed-width or comma separated values (CSV) FVT/GE Program Error/Acknowledgement File.

- **Header, Detail, and Trailer Records** – Each FVT/GE Program Error/Acknowledgement File contains a single Header record, one Detail Record with one error code at the end of the applicable record, and a single Trailer record. If there are no errors found in the FVT/GE Program Submittal File, then there will only be a single Header record and a single Trailer record returned to acknowledge NSLDS received the Submittal File. The Header record identifies the source of the file and the date the record-level error was generated, as well as other identifying information. The Detail record identifies the record that has received an error. As noted above, only one record-level error will be returned. In the future, the Detail Record will display up to five errors. Records without errors that were accepted by NSLDS will not be included in the file. The Trailer record shows the number of Detail records contained in the file.

Descriptions of all record level edits are provided in Appendix B.

2.5 Timing

Each file type has a timing component associated with its processing. See Table 3 for the timing of each file.

Table 3: FVT/GE Program Submittal Source, Target, and Timing

File Type	Source/From	Target/To	Frequency/Timing
FVT/GE Program Submittal File	Institutions	NSLDS	Schools are required to submit program data on an annual basis, with the option to report more frequently if desired. The deadline to report 2024 FVT/GE data is January 15, 2025. All subsequent FVT/GE reporting will be due by October 1st, after the most recently completed award year.

FVT/GE Program Error/Acknowledgement File	NSLDS	Institutions	Within 36 hours of NSLDS successfully processing the FVT/GE Program Submittal File with no file-level errors.

If a school submits an FVT/GE Program Submittal file and does not receive an FVT/GE File-Level Error File or an FVT/GE Program Error/Acknowledgement within 36-38 hours of submitting, please call the NSLDS Customer Support Center for assistance.

Batch files are submitted using the school's SAIG TG Mailbox associated with the FVT/GE Batch services as designated by the school. Schools will submit the FVT/GE Program Submittal File to the NSLDS TG Mailbox TG50012 and NSLDS will return the File-Level Error File, or the Error/Acknowledgement File from the same TG Mailbox, TG50012.

Table 4 and 5 displays the message classes for the FVT/GE Program Batch Submittal File, FVT/GE Program File-Level Error File, and the FVT/GE Program Error/Acknowledgement File for both the fixed-width format and CSV format.

Chapter 3: Program Submittal via NSLDSFAP

Starting in late summer 2024, schools may choose to submit FVT/GE program data to NSLDS via the NSLDS Professional Access website. In order to report program data via the web, a user associated with your school must have an active NSLDS User ID with Enrollment Update access.

3.1 FVT/GE Programs Page

The FVT/GE Program page can be found by clicking the FVT/GE Programs link under the FVT/GE tab on the NSLDS Professional Access website. This page displays detailed information regarding programs associated with the six-digit OPEID and allows schools to view program data they submitted through either the FVT/GE Program Batch Submittal File or the FVT/GE Spreadsheet Submittal process. Schools will, in the future, be able to add new program data, edit current data, or deactivate previously submitted FVT/GE program records.

Figure 7: NSLDS Homepage – FVT/GE Programs Link

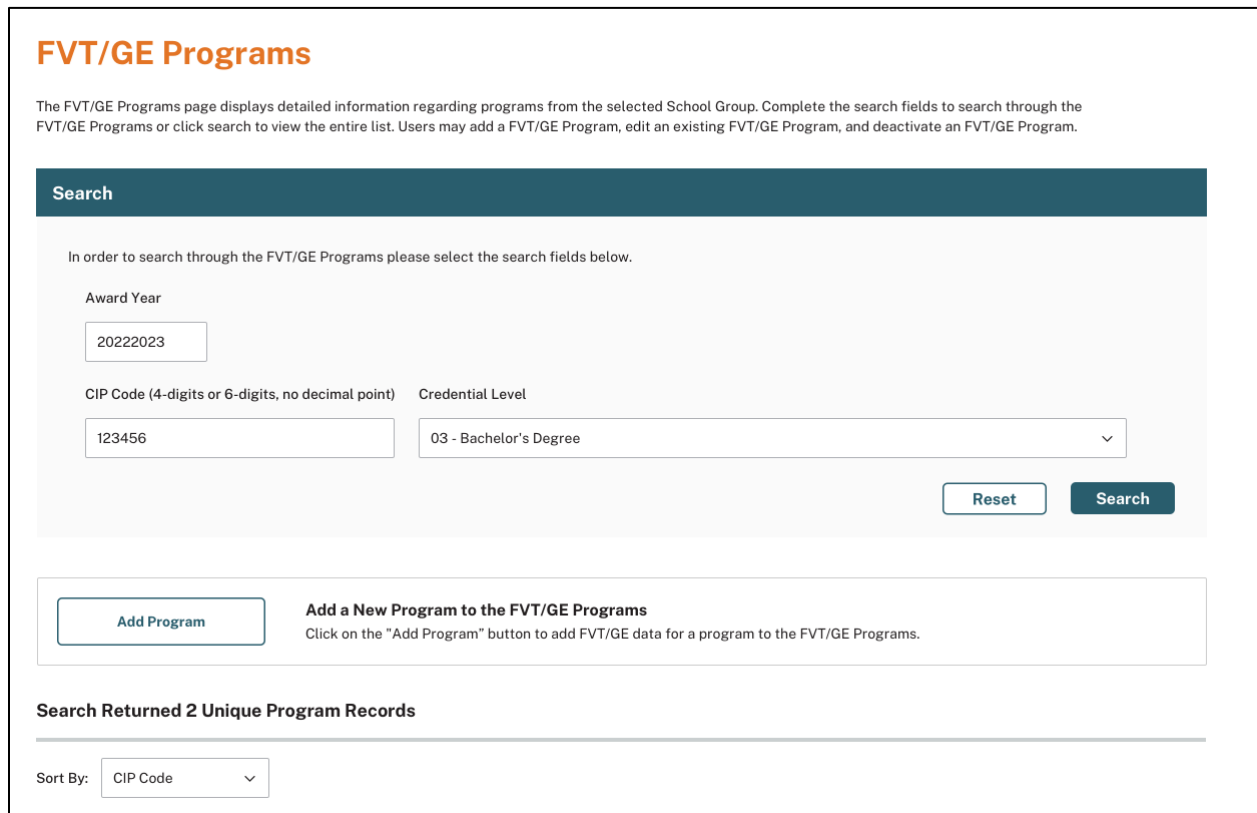

Figure 8: FVT/GE Programs Page - Search

The FVT/GE Programs page allows users to search for specific programs by the following fields:

- **Award Year** – Award year the student was enrolled in the program.
- **CIP Code** – The four or six-digit Classification of Instructional Programs code (without period) identifying a program's academic content.
- **Credential Level** – Credential Level of the program the student was enrolled in during the award year.
 - 01 – Undergraduate Certificate or Diploma Program

- 02 – Associate degree
- 03 - Bachelor's Degree
- 04 - Post Baccalaureate Certificate
- 05 - Master's Degree
- 06 - Doctoral Degree
- 07 - First Professional Degree
- 08 - Graduate/Professional Certificate

Once the user clicks the 'Search' button the FVT/GE Programs Page either displays the entire list of records or a list of records based on the selected criteria. This page will display programs submitted by the school via the web, the FVT/GE Program Batch Submittal File, or the Program Spreadsheet Submittal process. Additionally, the count of records returned will be displayed.

The following fields are not mandatory and should only be submitted if they are applicable:

- Program Name
- CIP Year
- Qualifying Graduate Program
- Programmatically Accredited
- Accrediting Agency Name

- Liberal Arts Bachelor's Degree Program at Proprietary Institution
- Count of Program Graduates who Attempted Licensure Exam
- Count of Program Graduates who Passed Licensure Exam
- Count of Enrolled Students in the Program (Title IV and non-Title IV students)
- State of Main Campus
- Program Prepares Students for Licensure in State of Main Campus
- State Two/Three/Four/Five in MSA of Main Campus
- Program Prepares Students for Licensure in MSA State Two/Three/Four/Five

Additional details on the definitions of these fields can be found in Appendix A.

When all applicable fields have been populated with no errors, the user will click the 'Add Program' button to submit the program to NSLDS. Upon successfully adding a program, users will be automatically brought back to the FVT/GE Program page and a message will display stating: 'The FVT/GE Program record was successfully added'.

3.3 Edit FVT/GE Program Data

Users will have the ability to edit existing FVT/GE Program data via the web, regardless of whether the program data was initially submitted by batch, web, or spreadsheet submittal. However, users are only able to update FVT/GE program information and may not edit program identifiers or the award year. In order to update program identifiers or the award year, you must invalidate the entire program record through batch or deactivate the program record via the web.

To edit Program information, click the 'Edit' link within the respective program record you wish to update.

As a result, the applicable program record will be removed from the school's Program list for both web and batch processing. Should the user decide to add a program that has been deactivated back, they will need to manually add the program record again via batch, web, or spreadsheet submittal.

Chapter 4: FVT/GE Spreadsheet Submittal Process

The FVT/GE Spreadsheet Submittal process allows schools to report FVT/GE program data to NSLDS via spreadsheet upload on the NSLDS Professional Access website. The FVT/GE Program Spreadsheet Submittal is located on the Spreadsheet Submittal page under the School tab on NSLDSFAP. School users are required to have NSLDS Enrollment Update access to utilize the spreadsheet submittal template for reporting FVT/GE program data to NSLDS via the spreadsheet submittal process.

The spreadsheet layout is available in Appendix E and will be processed in real-time. Any errors will be presented to the school. Upon successful upload of a file and processing of the data, the information will be used to update the NSLDS database.

4.1 Creating a Spreadsheet

The FVT/GE Spreadsheet Submittal is another tool that can be used by schools to submit program specific FVT/GE data. Users can create their own spreadsheets or use the template provided. The spreadsheet can be created with the first row containing the field names, found in Appendix E, or by utilizing the template that is available for download on the Spreadsheet Submittal page. In order for NSLDS to accept the spreadsheet template the first row must contain the field names. If the school chooses to create their own spreadsheet template, the fields found in Appendix E must be used as a reference.

It is crucial that the user created spreadsheet is saved securely. It is also recommended that the spreadsheet have a unique name so that it can be easily identified during the upload process. Please ensure that when saving the file, it is saved as a spreadsheet file in a format with an extension of .xls or .xlsx (Excel™ format). Any other extensions will cause the entire file to be rejected.

The spreadsheet has a file size limit of 5,000 KB (5 MB). Any file size over this limit will cause the spreadsheet to be rejected. File size varies depending on amount of data in the spreadsheet.

Figure 17: Program Spreadsheet Submittal Template

4.1.1 Rename Worksheet

If the user is not using the available template for download, the first step in creating the spreadsheet is to rename the worksheet that will be utilized for data entry, and subsequent data upload. To rename the worksheet:

1. Right click on the worksheet tab name.
2. Select Rename.
3. When the current name of the tab is highlighted, type "upload file".
4. Click out of the tab and the name will be stored.

Figure 18: Rename Worksheet

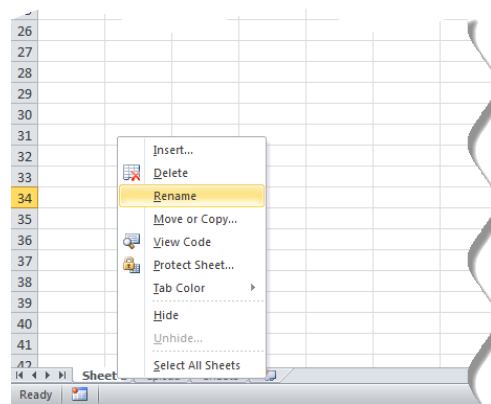

Figure 19: Rename Worksheet

NSLDS will look for a worksheet with the name **“upload file”**. If the worksheet has any other name, NSLDS will attempt to load the data found in the first tab, or Sheet 1, of the spreadsheet. If Sheet 1 is empty, the user will receive the message “Spreadsheet has no data”. It is suggested that the worksheet be correctly labeled for upload.

Also, NSLDS will only process one worksheet per spreadsheet, per upload. Any other worksheets will be ignored if they are present in the file, as will any records they may contain. If there are additional sheets that need to be submitted, after the first worksheet is uploaded, the school can rename the initial uploaded file to a different name and name the next sheet to “upload file”. Submit the file to NSLDS again, and the new page will be uploaded.

4.1.2 Spreadsheet with Field Names

When creating the spreadsheet, the field names are to be created by the user. The names of the fields must match to those presented in Appendix E and each name must be contained within an individual column. The names of the fields will appear in Row One, beginning in column A with “Record Type” and ending in column AB with “Invalid Flag”. Schools are permitted to enter data within columns A through AB. The user created spreadsheet submittal does not require Header and Trailer Records as the batch file does. Fields identified as optional do not require data to be provided. However, the column for the field names must still appear in the spreadsheet, even if the data is not being supplied.

4.2 Uploading a FVT/GE Spreadsheet Submittal File

The Spreadsheet Submittal page is found under the School tab on the NSLDS Professional Access website and allows users the ability to report FVT/GE data via spreadsheet submittal.

The page allows the user to search for the spreadsheet submittal file they would like to submit and upload it from the location where it is securely stored. Because of the sensitivity of the information included in the file, it must be saved in a secure manner on the local hard drive of the user’s computer or stored in a secure manner on an external medium such as a flash drive or network. Once the file is located, the user will then need to select the manner for which errors, if any, will be returned.

4.2.1 FVT/GE Spreadsheet Submittal Page Results

After the FVT/GE spreadsheet has been uploaded, validation is done to identify if there are any errors in the file. Users must ensure they click the 'Validate and Submit' button to confirm the spreadsheet was submitted. When the user selects 'Validate and Submit' the system will review and validate all data in the spreadsheet. Any records that were submitted and successfully passed validation with no errors will be processed.

If any record that was submitted triggers an error, a message will display along with the number of records with errors. Additionally, a link will be provided under the 'Download Errors' section on the Spreadsheet Submittal page, enabling the user to identify records that need corrected.

Figure 21: Spreadsheet Submittal Page – Download Errors

Total No. of Records	No. of Records Processed	No. of Records with Errors	Download Errors

Once the user clicks the Download Errors link, the submitted FVT/GE Spreadsheet Submittal File displays all submitted records and highlights all cells in error for each applicable record. These errors will be highlighted for the user to easily access once they download the Error File. NSLDS will display the errors and their descriptions in the Error (AC) Column.

4.3 Working Errors

All records are validated against the edits described in Appendix B, and any errors will be identified in the Errors (AC) Column of the Errors File. Users have the option to correct data in the Errors File directly or make corrections in the original file that was submitted. If opting to correct errors in the Error File, users should rename the file before resubmitting to maintain a record of prior submittals. Regardless of the chosen method, any records in error must be corrected and resubmitted to NSLDS for processing. If there is a need to remove rows from the spreadsheet, the 'Delete Row' function in Excel should be utilized to ensure complete removal of the applicable data.

Appendix A: FVT/GE Program Submittal File Record Layouts

This appendix outlines the file layout for the FVT/GE Program Submittal File, the file layout for the FVT/GE Program File-Level Error File including the file-level error definitions, and the file layout for the FVT/GE Program Error/Acknowledgment File including the record-level error definitions.

Institutions will submit an FVT/GE Program Submittal file to NSLDS. NSLDS will return an FVT/GE Program File-Level Error File if the submittal file fails file-level validations, or an FVT/GE Program Error/Acknowledgment File if the submittal file passes all file-level validations but contains records-level errors or for NSLDS to confirm receipt of the submittal file.

When an institution receives an FVT/GE File-Level Error File, it indicates that NSLDS could not process the submittal file because it contained file-level errors. File level errors are generally caused by invalid values in the header and/or trailer records, an incorrect TG mailbox or incorrect detail record counts in the trailer record. When an institution receives an FVT/GE Error/Acknowledgment File containing one header record and one trailer record, it indicates that NSLDS received the submittal file with no errors and it was successfully submitted to NSLDS. If the FVT/GE Program Error/Acknowledgment File contains one header, one or more detail records, and one trailer record, NSLDS found record-level errors in the FVT/GE Program Submittal File. Institutions may correct the errors received in the FVT/GE Program File-Level Error File or FVT/GE Program Error/Acknowledgment File and submit the FVT/GE Program Submittal file again to NSLDS.

Appendix A includes information on the following layouts:

- Fixed-Width
- Comma Separated Values (CSV)

The Fixed-Width (FW) layout includes the following information for each field:

- **Pos FR-** (Position From) – Starting position of the field (Please note that Pos FR (Position From) only applies to Fixed-Width).
- **Pos TO-** (Position To) – Ending position of the field (Please note that Pos TO (Position To) only applies to Fixed-Width).
- **Attribute/Name-** Brief, descriptive title of the field.
- **Description-** Short narrative definition of the field.
- **Field Format-** Indicator of the kind of value that must be in the field, as follows:

- Char. (Character) denotes a field that may contain spaces, letters, or numbers in any combination—for example, 17 Magnolia Street. Character fields not specifically reported must be filled with spaces. If a field is said to require a value 'greater than spaces', the field must contain at least one letter or number.
- Num. (Numeric) denotes a field that must contain only numbers—for example, 12345 as a Detail Record Count in a trailer record. Letters, special characters, or spaces in a numeric field are invalid. An entry of T491_24, for example, would not be accepted. Unless otherwise specified in the record layout, numeric fields not specifically reported must be filled with zeroes.
- Date fields must contain only numeric data, 8 digits, and appear in the format CCYYMMDD, where:
 - CC = 2-digit century
 - YY = 2-digit year
 - MM = 2-digit month designation (01–12)
 - DD = 2-digit day designation (01–31, depending on month and year)
 - Under this convention, an entry of **20140430** would be accepted, but **043014** would not. Unless otherwise specified in the record layout, date fields not specifically reported must be filled with zeroes.
- **Lth (Length)/Size-** Number of bytes the field occupies (Please note that Lth (Length) only applies to Fixed-Width).

The field composition of the layout description includes all of the information listed above in addition to the following:

- **Comments-** Additional information about the field.
- **Edit(s)-** Description of the error checking that NSLDS applies to the file that is returned.
- **Reporting-** Instructions indicating whether the field must contain data other than spaces or zeros are described below:
 - *Mandatory-* Fill in this field for every Detail record.
 - *Optional-* Fill in this field if the information is applicable.
