These post-screening codes are intended for students and borrowers who are eligible for this exception and remain qualified under the pre-OBBBA aggregate loan limits. Once the borrower no longer meets the exception criteria, NSLDS will discontinue sending these informational codes and will instead generate the appropriate code based on the conditions of the relevant post-screening reason code that apply at that time.

Correction Data Entry Specifications

You can use this table in conjunction with the Correction Record Layout found in the *FAFSA Specifications Guide, Volume 4A – Record Layouts*. This table defines the valid field content for all correctable FPS fields. It includes the EDE number, field length, column for changes, and valid data to send for each field on a correction record. The table also indicates the FAFSA question number.

Use the EDE # as the EDE Field # in the Correction Export Record Layout. Adhere to the Valid Field Content values for the EDE # in the Valid Field Content for the corresponding Field Data field.

Notes:

- Data is sent using left justification without adding leading zeros in numeric values. For example, a nine-digit field would be submitted as follows:
  - $1,234 would be sent as “1234”
  - -$5,678 would be sent as “-5678”
- At this time, the Financial Aid Administrator (FAA) cannot update all FAFSA data—including PII information—for a student or contributor. PII data includes the first, middle, or last name; suffix; Social Security number; or date of birth. Likewise, the FAA cannot add data for a new contributor to a record. In cases where the PII data needs to be corrected, the FAA must work with the student or contributor to have them make the necessary updates to their FAFSA data online or on a paper FAFSA Submission Summary. The one exception to this rule is that an FAA can submit a correction to EDE # 245, Parent Spouse or Partner’s date of birth, when the spouse or partner is not a contributor.
