

COD School Report Changes October 2017 – Summary Table
Attachment to July 2017 Electronic Announcement (Updated September 2017)

Since July 2017, Federal Student Aid determined that additional reports required layout changes that were not originally listed. On September 28, 2017, we updated this attachment to include information about the layout changes for three additional reports. The updated text appears in red and is marked with an asterisk (). We also added the recently-implemented Direct Loan SULA Adjustments Needed Report to the table.

This table summarizes the changes to school reports that will be made during the period October 13-15, 2017. The reports are listed in alphabetical order. **Note:** The two columns on the far-right list the available report formats for the Student Aid Internet Gateway (SAIG) and the COD Web Site for the first iteration of the report *after* October 15, 2017.

Detailed information about all school reports produced and sent by the COD System is available in Volume VI, Section 8 of the [2017-2018 COD Technical Reference](#).
