**SUPPLEMENTARY INFORMATION:** The V-22 aircraft, known as the Osprey, represents a new technology in military aviation. This aircraft utilizes tilt-rotary technology to enable it to operate like a rotary-wing aircraft and a fixed-wing aircraft. The V-22 will replace the CH-46E and CH-53D rotary-wing aircraft. Accordingly, its primary mission will be to support Fleet Marine Expeditionary Force training and operations. The first aircraft is scheduled to be delivered to the Marine Corps in 2000 and delivery of the final aircraft is scheduled in 2014.

The Marine Corps intends to introduce the V-22 to the Second Marine Corps Aircraft Wing first, then introduce it to the Third Marine Aircraft Wing and First Marine Aircraft Wing.

Delivery of V-22 to Second Marine Air Wing is scheduled to begin in 2000 and be complete in 2006. Introduction of the V-22 to Third and First Marine Air Wings would commence after introduction to the Second Marine Air Wing is complete.

The proposal being evaluated in this EIS is the basing of six squadrons of fleet V-22 aircraft to the Second Marine Aircraft Wing. Also, this proposal includes the establishment of a Fleet Replacement Squadron, which would provide training for all military pilots. This proposal includes construction of facilities to accommodate the aircraft, equipment and personnel. Finally, the proposal includes the use of existing outlying fields and airspace for military aircraft in support of training.

The primary mission of the V-22 in Second Marine Aircraft Wing will be to support medium-lift requirements of Second Marine Expeditionary Force training and operations. Marine Corps Base (MCB) Camp Lejeune is the home of the Second Marine Expeditionary Force. Accordingly, alternatives to be considered in the EIS are all Department of Defense aviation facilities within the operational radius (300 miles) of the V-22 from MCB Camp Lejeune. Alternatives identified so far include Marine Corps Air Station (MCAS) New River, MCAS Cherry Point, MCAS Beaufort, Marine Corps Air Facility Quantico, Naval Air Station (NAS) Oceana, NAS Norfolk, Fort Bragg, Pope Air Force Base (AFB), and Langley AFB. Additional alternatives discovered during preparation of the EIS will be evaluated appropriately.

To focus the EIS analysis to those alternatives that are reasonable, a screening criteria will be used. These criteria include compatibility of MV-22 operations with existing aviation operations, proximity to MCB Camp Lejeune, availability of existing facilities to support aircraft, equipment and personnel, and proximity to existing outlying landing fields.

Environmental issues identified thus far to be addressed in the EIS include: geological resources, biological resources, water resources, noise, air quality, land use compatibility, cultural resources, socioeconomic, environmental justice, public health and safety, transportation/circulation, aesthetics, utilities, hazardous materials, and solid waste.

Dated: August 10, 1998.
