

38. Total Annual hours for Collection: 36 reporting + 36 recordkeeping = 72 hours.

Information Collection Costs: The Commission seeks comments on the costs to comply with these requirements. It has projected the average annualized cost to be \$5,760, as shown below:

Reporting = 36 hours @ \$120/hour = \$4,320
Recordkeeping = 36 hours @ \$40/hour = \$1,440
Total Costs = Reporting (\$4,320) + Recordkeeping (\$1,440) = \$5,760

39. Interested persons may obtain information on the reporting requirements by contacting: Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426 [Attention: Ellen Brown, Office of the Executive Director, Phone: (202) 502-8663, fax: (202) 273-0873, e-mail: DataClearance@ferc.gov]. Comments on the requirements of the proposed rule may also be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 [Attention: Desk Officer for the Federal Energy Regulatory Commission]. Please reference OMB Control Number 1902-0246 and the docket number of this proposed rulemaking in your submission.

V. Environmental Analysis

40. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.³¹ The actions proposed here fall within the categorical exclusion in the Commission's regulations for rules that are clarifying, corrective or procedural, for information gathering, analysis, and dissemination.³² Accordingly, neither an environmental impact statement nor environmental assessment is required.

VI. Regulatory Flexibility Act Analysis

41. The Regulatory Flexibility Act of 1980 (RFA)³³ generally requires a description and analysis of final rules that will have significant economic impact on a substantial number of small entities. Most of the entities (*i.e.*, reliability coordinators and balancing

authorities) to which the requirements of this Rule would apply do not fall within the definition of small entities.³⁴ The Commission estimates that only 2–4 of the 35 balancing authorities (or a maximum of 11.4%) are small. The proposed Reliability Standard reflects a modification of existing requirements. Based on the foregoing, the Commission certifies that this Rule will not have a significant impact on a substantial number of small entities. Accordingly, no regulatory flexibility analysis is required.

VII. Comment Procedures

42. The Commission invites interested persons to submit comments on the matters and issues proposed in this notice to be adopted, including any related matters or alternative proposals that commenters may wish to discuss. Comments are due December 28, 2010. Comments must refer to Docket No. RM09-19-000, and must include the commenter's name, the organization they represent, if applicable, and their address in their comments.

43. The Commission encourages comments to be filed electronically via the eFiling link on the Commission's Web site at <http://www.ferc.gov>. The Commission accepts most standard word processing formats. Documents created electronically using word processing software should be filed in native applications or print-to-PDF format and not in a scanned format. Commenters filing electronically do not need to make a paper filing.

44. Commenters that are not able to file comments electronically must send an original copy of their comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street, NE., Washington, DC 20426.

45. All comments will be placed in the Commission's public files and may be viewed, printed, or downloaded remotely as described in the Document Availability section below. Commenters on this proposal are not required to serve copies of their comments on other commenters.

1. The Commission initiated this proceeding to amend the Commercial Radio Operators rules, and related rules in parts 0, 1, 80, and 87 regarding certain functions performed by licensed commercial radio operators (COLEMs). Specifically, the Commission proposed in the NPRM to amend the commercial

radio operator rules to: (1) Cease granting new First and Third Class Radiotelegraph Operator's Certificates, and seek comment on extending the current five-year license for radiotelegraph operator certificates to ten years or the lifetime of the holder; (2) eliminate prohibitions against holding two licenses at the same time, and restrictive endorsements; and (3) make the COLEMs responsible for maintaining the question pools for commercial radio operator examinations, stop requiring them to submit examination-related records on a regular basis, and make additional administrative changes relating to the examinations such as recordkeeping, electronic filing, and submission of records to the Commission. In the NPRM, the Commission also seeks comment on whether and how to harmonize the part 80 equipment testing and logging requirements, and proposes other administrative and editorial amendments.
