1.0 Introduction

NSLDS combines the Transfer Student Monitoring (TSM) and Financial Aid History (FAH) batch process into one input format file and one output format file. This document, which describes the file formatting for the combined file, replaces the earlier version of the Transfer Student Monitoring/Financial Aid History Processes and Batch File Layouts dated March 17, 2003.

As of December 29, 2003, NSLDS will start using the file formats described in this document. Requests will need to be in these file formats and submitted as an input file through the SAIG message class, TRNINFIN. After NSLDS verifies that the data requests are in the proper file formats, an output-processed file will be sent back to the end user. Depending on the data type requested, the output file will be returned through the SAIG in the TRLTRPOP, TRALRTOP, FAHREPOP, or FAHEXTOP message classes.

Because of 2004/2005 processing changes, updates were made to the Transfer Student Monitoring/Financial Aid History batch file record layouts. NSLDS has attempted to minimize the impact on your current systems. The file layout sections include an Add/Modify column annotating specific changes.

2.0 Overview

2.1 Batch File Process

NSLDS combines the batch TSM and FAH process. The result is one common input file and one common output file. Schools use one input file to tell NSLDS if it is requesting a student Financial Aid History, adding the student to the Transfer Student Monitoring list, or both. (For example, the school would like NSLDS to provide a FAH, and add the student to the Transfer Student Monitoring list for a possible Alert if relevant data changes.) The current Transfer Student Monitoring rules still apply. Schools use FAH for reasons such as student eligibility, research, trend analysis, and default management.

In accordance with final regulations published on November 1, 2000, on July 1, 2001 NSLDS implemented a new Transfer Student Monitoring Process for students that transfer from one school to another during the same award year (mid-year transfer students). Under the Transfer Student Monitoring Process, a school 'Informs' NSLDS of its mid-year transfer students, NSLDS 'Monitors' changes in the financial aid history of those students, and 'Alerts' the school of any relevant changes.

After a school informs NSLDS about a mid-year transfer student, NSLDS monitors changes to the student's financial aid history information from the date that the latest ISIR for the student was generated and sent to the school. NSLDS checks to see if there have been any changes in the student's financial aid history that may be relevant to the student's eligibility for aid at the new school. Such changes might include a new or cancelled loan or a new or revised disbursement of a loan or grant. NSLDS continues to monitor changes in the student's financial aid history since

the last Alert it sent to the school.

If there is a relevant change to the student's financial aid history, NSLDS will 'Alert' the school. *The school must then review the change to determine if it affects the student's eligibility for Title IV aid.* NSLDS will not Alert a school if there are no relevant changes to the student's financial aid history.

The Transfer Student Monitoring Process is run weekly. *After a school informs NSLDS, it must wait seven days before it can make a disbursement of Title IV aid to an otherwise eligible student.* The school does not have to wait, however, if it receives an Alert from NSLDS during the seven-day period or it obtains the student's financial aid history information directly by accessing the NSLDS Web site at www.nsldsfa.ed.gov, or receiving and reviewing the results from a batch Financial Aid History from NSLDS.

In cases where the school makes a disbursement to an eligible student, but later receives an Alert from NSLDS, the school must access and review the student's financial aid history to determine whether an action needs to be taken regarding that disbursement or any subsequent disbursements.

Please note that information about defaulted loans and overpayments will continue to be provided to schools under the NSLDS Postscreening process.

Schools can inform NSLDS of students to be monitored using the Transfer Student Monitoring pages at www.nsldsfa.ed.gov or by sending an 'Inform' batch file to NSLDS. The batch file layouts are provided in this document.

Schools may do the entire Transfer Student Monitoring process using the Web pages. This may be particularly attractive for schools with a relatively small number of transfer students. The batch process enables schools to automate the process for exchange of data electronically rather than using the Web pages. Schools may use both methods if they choose. For example, a school may wish to send an initial file using the batch process and then use the Web to add additional students or to change or delete students from their Transfer Student Monitoring List.

2.2 Batch Files Used

Because of differences in schools' computer systems, NSLDS cannot provide software to create batch files. However, this document contains the details needed for a school to create an 'Inform' file and to receive Error/Acknowledgment and Alert files.

The batch files consist of the following:

- **TSM/FAH Batch Inform File**—Schools use this file to submit a list of students for NSLDS to return a FAH or to monitor. If requested, NSLDS monitors the students submitted on this batch file and through the NSLDSFAP Web site, and Alerts the informing school of any changes affecting eligibility *not* covered by the current postscreening process.
- **TSM/FAH Error/Acknowledgment File**—NSLDS returns this file to the schools as a receipt of the Batch Inform file. This file will list any errors or warnings that result from the submission of the Batch Inform file. If there are no errors and no warnings, the Error/Acknowledgment file contains only a Header and Trailer record. There may be more than one error for any given detail record, so the number of records in the Error/Acknowledgment file may be greater than the number of detail records sent in the Batch Inform file. Any error or warning in the Batch Inform file will be identified by the Field Number and an Error/Warning Code.
- **Financial Aid History File**—This file contains the student’s full NSLDS Financial Aid History. This file can be received in either extract or report format. The file contains separate records for Aggregates, Perkins, Flags Record; Name History Record(s); Overpayment Record(s); Pell Payment Record(s); and Loan Detail Record(s).
- **TSM Alert File**—This is sent to schools only when a relevant change has been identified in the record of a student on the school’s Monitoring List. These changes include new or cancelled loans or Pell grants, new or changed disbursements, and changes to balances of loans. The changes prompting an Alert file do *not* include newly reported defaulted loans or overpayments. That information will continue to be sent to schools on ISIRs using the existing Postscreening process. The TSM Alert file contains the student’s full NSLDS Financial Aid History with flags designating changes to the student’s Pell, Loan, or Aggregate information. This file can be received in either Extract or Report format. The file contains separate records for Aggregates, Perkins, Flags Record; Name History Record(s); Overpayment Record(s); Pell Payment Record(s); and Loan Detail Record(s).

All batch files contain one header record, a set of detail records for each student, and one trailer record as indicated below:

Header Record
 Detail Record(s) for Student 1
 Detail Record(s) for Student 2
 .
 .
 .
 Detail Record(s) for Student N
 Trailer Record

2.3 Message Classes

There will be multiple message classes for the TSM/FAH batch files: one each for the Inform, the Error/ Acknowledgment, the report format Alert, the data/extract format Alert, the report format FAH, and the data/extract format FAH. The message class names used to send/receive these files are listed in the following chart:

Message Class	Process flow	SAIG Mailbox ⁽²⁾ (send/receive)	Description
TRNINFIN	From school/servicer to processor (NSLDS)	School/servicer send to TG53163	School Batch Inform/FAH request file (used for both FAH requests and/or TSM batch informs- see record layout to indicate request type(s) and format)
TRNINFOP ⁽¹⁾	From processor (NSLDS) to school/servicer	School/servicer receive from TG53162	Error/Acknowledgement file (used by both FAH requests and TSM batch informs. Each properly formatted TRNINFIN file will have an error/acknowledgement file).
FAHEXTOP	From processor (NSLDS) to school/servicer	School/servicer receive from TG50012	FAH processed output file in extract format
FAHREPOP	From processor (NSLDS) to school/servicer	School/servicer receive from TG50012	FAH processed output file in report format
TRLTRPOP	From processor (NSLDS) to school/servicer	School/servicer receive from TG53162	Transfer Monitoring Alert file, report format
TRALRTOP	From processor (NSLDS) to school/servicer	School/servicer receive from TG53162	Transfer Monitoring Alert file, extract format

⁽¹⁾ If an acknowledgement file is not sent to the SAIG mailbox within the next business day, contact NSLDS customer service (800-999-8219) for assistance.

⁽²⁾ The Department of Education's transmission software has the mailboxes predefined.

As in the past, before submitting any student records to NSLDS for the Transfer Student Monitoring process, schools *must* access and complete their School Alert Profile on the NSLDS FAP Web site. Schools can designate a servicer to submit Inform and receive Alert information. This arrangement, however, must be reported on the School Alert Profile page by providing the servicer's TG number. Schools sign-up for the TSM/FAH batch process on the enrollment document through the SAIG. Schools can do this at www.sfawebenroll.ed.gov.

2.4 Definitions of Columns

The following column labels are used in all file layout tables presented in this document.

- **Field Number**—Number assigned to a specific block of information. This number will easily identify which field is in error on an Error/Acknowledgment file.
- **Position From**—Position in the file in which a specific block of information begins.
- **Position To**—Position in the file in which a specific block of information ends.
- **Added/Modified**—For information purposes only. It is to be used as a reference to quickly determine what has changed from previous publications.
- **Attribute**—Name of the specific field.
- **Description**—Description of the information held in a specific field.
- **Field Format**—Denotes what type of data can be reported in a specific field. For example, a Field Format that says Date will create an error if it contains letters. All dates are in CCYYMMDD format.
- **Field Length**—Number of bytes in the file occupied by a specific block of information.

3.0 Transfer Student Monitoring/Financial Aid History Batch Inform File Layouts

Schools create this file to submit a list of students to NSLDS to request Financial Aid Histories (FAHs), add students to the Transfer Student Monitoring (TSM) list, or both. NSLDS will return FAHs, monitor the students provided on this file, or do both as requested.

The following record layouts describe the input Header, Detail, and Trailer records for the Batch Inform file created by schools or school servicers. Schools using the batch process are required to create their Batch Inform file following these standards. Records not meeting format requirements or which fail edits will be rejected. These records must be resubmitted or entered on the Web for the student to be monitored.

The TSM/FAH Batch Inform file may be submitted as often as needed by a school and can be the TSM alone or the combination TSM/FAH. NSLDS expects to review files as received and return an Error/Acknowledgment file shortly thereafter. A school may submit multiple files in a day if it so chooses. An Error/Acknowledgment file will be sent in response to each Batch Inform file received and accepted by NSLDS. If an entire TSM/FAH Batch Inform file errors out, the school or servicer will not receive an Error/Acknowledgment file. In that case, the school or servicer should call the NSLDS Customer Service Center for assistance.

Remember, before submitting your first Batch Inform file for the Transfer Student Monitoring process, you must set up the school's preferences. *If the School Transfer Profile page has not been completed at www.nslsdfap.ed.gov, the entire Batch Inform file will be rejected.*

To set the school's preferences, click the Tran tab and then select School Transfer Profile. Or, you can go to the Transfer Monitoring section of the Menu page and click the School Transfer Profile link. After your school's Transfer Profile has been completed, you may submit your batch file.

3.1 Transfer Student Monitoring/Financial Aid History Batch Inform Header Record Layout

The first record in the file must be a Header record. The Header record must be populated exactly as stated or the entire file may be rejected. The length of the Batch Inform Header record file is 150 bytes long. Any file that is rejected must be reprocessed to add the students to the Transfer Student Monitoring list.

- **Record Type Indicator**—If this field contains any character other than a 0 (zero), the entire Batch Inform file will be rejected.
- **Header Title**—If this field contains any information other than TSM/FAH INFORM HEADER (all in UPPER CASE), the entire Batch Inform file will be rejected.
- **School Code**—This is the school's OPEID number. It is a six-digit school code combined with the two-digit school branch code. If this OPEID number does not match the current listing of valid school codes, or if the SAIG mailbox from which the file is sent does not match the OPEID number in the Batch Inform file, the file will be rejected. Servicers must submit a header record for each school.
- **Servicer Code**—If the school chooses to have a servicer submit the Batch Inform file on its behalf, the Servicer must fill in the Servicer Code field. If the school is submitting the file on its own behalf, this field must contain zeros.
- **Submittal Date**—This date must be in CCYYMMDD format (two digit Century, two digit Year, two-digit Month, two-digit Day).
- **Submittal Sequence Number**—When a school or servicer submits a Batch Inform file, the first file must contain 01 in this field. If the school or servicer submits more than one file per day, this number must increment for each subsequent file submitted. This allows the school to easily recognize which submission they are receiving an Error/Acknowledgment file for. This field must contain numbers only.
- **Report Type for FAH**—The FAH is available in a report or extract format. A school or servicer indicates preference in this field. Alert preferences are determined by the information provided on the School Transfer Profile page on the NSLDSFAP Website.
- **Filler**—This is left as blank space. If NSLDS or the Department of Education later determines that more information is needed in the Header record, additional fields will be added here.

TSM/FAH Batch Inform Header Record Layout

Length = 150

Field Number	Pos. From	Pos. To	Added/Modified	Attribute	Description	Field Format	Field Length
101	1	1		Record Type Indicator	Indicator used to identify the header record. Value must be 0 (zero).	Char.	1
102	2	47		Header Title	Title used to identify the header record. Value = TSM/FAH INFORM HEADER	Char.	46
103	48	55		School Code	The eight-digit ED OPE Code used to identify the school and branch submitting the file. Last two digits equal 00 if there is no branch code. Mandatory for schools and servicers.	Char.	8
104	56	63		Servicer Code	The NSLDS-assigned code for the servicer submitting the file on behalf of one or more schools. School servicers indicate their code; schools fill with zeros.	Char.	8
105	64	71		Submittal Date	Date (year, month, and day) on which the Batch Inform file is submitted. Format is CCYYMMDD. This date will determine award year for Perkins loans.	Date	8
106	72	73		Submittal Sequence Number	Used to differentiate between multiple batches submitted the same date. Numeric values only. Start with 01 and increment for multiple submittals on the same day. This allows the school to recognize which submission they are receiving an Error/Acknowledgment file for.	Char.	2
107	74	74		Report Type for FAH	Type of format in which the FAH is provided. The default type is an extract data file. Values are: R = a formatted report file is generated E = an extract data file is generated	Char.	1
N/A	75	150		Filler	Blank attribute to complete record length.	Char.	76

3.2 Transfer Student Monitoring/Financial Aid History Batch Inform Detail Record Layout

A separate record is created for each student submitted in the Batch Inform file. You may submit as many or as few records in one submittal as you wish. A Batch Inform file can also be used to update or delete a student from the Monitoring List.

NSLDS will process all records received and accepted. If a new record is received, NSLDS will determine if the request is for a FAH, an addition to the Monitoring List or both. If you wish to change information previously submitted, resend the record with the new information. NSLDS will update the record with the new information. You may also delete a record by populating field 208 with Y. To delete a record, all the student identifiers and the Enrollment Begin Date must match the previously submitted values.

- **Record Type Indicator**—If this field contains any character other than a 1 (one), the entire Batch Inform file will be rejected.
- **Student's SSN**—Social Security Number of the student being sent. After the initial creation of the list, this field can be used to update or delete a student from the Monitoring List.

If the SSN submitted does *not* match an SSN in the NSLDS:

- For the Batch Inform file, the school will receive an Error/Acknowledgment file with warning code 701 “This student has been added to the Monitoring list, but cannot be found on the database.” When a Data Provider submits information on this student that adds the student to the database, an Alert will be generated.
 - For FAH requests, the school will receive an Error/Acknowledgement file with error code 101 “SSN not found”.
- **First Name**—First name of the student being sent.

If the SSN reported matches with the NSLDS database, but the name reported in this field does not match:

- For the Batch Inform file, the school will receive an Error/Acknowledgment file with warning code 702 “This student has been added to the Monitoring list, but cannot be found on the database”. When a Data Provider submits information on the SSN reported above, the school would receive an Alert, but that file will contain the name and DOB as reported in NSLDS.
 - For FAH requests, the school will receive an Error/Acknowledgment file error code 100 “Match on SSN, no match on DOB and Name”.
- **Last Name**—Last name of the student being sent.

- **Date of Birth**—Date of Birth of the student being sent. It must be in CCYYMMDD format. It must also pass reasonability edits.

If the DOB reported makes the student younger than 12, or older than 100, the record will be rejected. This date cannot be in the future.

If the SSN reported matches with the NSLDS database, but the DOB reported in this field does not match:

- For the Batch Inform file, the school will receive an Error/Acknowledgment file with warning code 702 “This student has been added to the Monitoring list, but cannot be found on the database”. When a Data Provider submits information on the SSN reported above, the school would receive an Alert, but that file will contain the name and DOB as reported in NSLDS.
- For FAH requests, the school will receive an Error/Acknowledgment file error code 100 “Match on SSN, No match on DOB and Name”.
- **Enrollment Begin Date**—Must be in CCYYMMDD format. It can be a future date, but not more than 18 months greater than the current date. It cannot be more than 90 days less than current date. For FAH requests only, fill the field with 00000000 (all zeros).
- **Monitor Begin Date**—Must be in CCYYMMDD format. It can be a future date, but not greater than the reported Enrollment Begin Date. If the Enrollment Begin Date has already passed, use the submittal date. For FAH requests only, fill the field with 00000000 (all zeros).
- **Delete from Monitoring and Alert List**—This is a one-character field used to specify whether the student is to be deleted from Monitoring List. The only time this should be populated with Y is if the student previously reported for Monitoring is not going to attend that school. N indicates that the student is being added or updated. If a student’s record is submitted in more than one Batch Inform file with no changes, any subsequent, identical Batch Informs will be ignored. For FAH requests only, must be space.
- **School Code**—This is the school’s OPEID number. It consists of a six-digit school code combined with the two-digit school branch code.

If this OPEID number does not match the current listing of valid school codes or if the SAIG mailbox from which the file is sent does not match the OPEID number in the Batch Inform file, the file will be rejected. Servicers must submit a header record for each school.

- **Request Indicator**—A one-character code indicating which request is being made. Values are:

- T = add the student to the Monitoring list only
- H = FAH only
- B = both

- **Filler**—This is left as blank space. If NSLDS or the Department of Education later determines that more information is needed in the Detail record, additional fields will be added here.

3.3 Transfer Student Monitoring/Financial Aid History Batch Inform Trailer Record Layout

Add a Trailer Record exactly as stated below. Incorrect data may cause the entire file to be rejected.

- **Record Type Indicator**—If this field contains any character other than a 9 (nine), the entire Batch Inform file will be rejected.
- **Trailer Title**—If this field contains any information other than TSM/FAH INFORM TRAILER (all UPPER CASE), the entire Batch Inform file will be rejected.
- **Record Count**—This field can only be populated with numbers. The number in this field must match the number of Detail records in this file.
- **Filler**—This is left as blank space. If NSLDS or The Department of Education later determine that more information is needed in the Header record, additional fields will be added here.

TSM/FAH Batch Inform Trailer Record Layout

Field Number	Pos. From	Pos. To	Added/Modified	Attribute	Description	Field Format	Field Length
901	1	1		Record Type Indicator	Indicator used to identify the trailer record. Value must be 9	Char.	1
902	2	47		Trailer Title	Title used to identify the trailer record. Value = TSM/FAH INFORM TRAILER	Char.	46
903	48	56		Record Count	Total count of detail records on this file (excluding header and trailer). Valid content: 000000001 to 999999999	Num.	9
N/A	57	150		Filler	Blank attribute to complete record length.	Char.	94

4.0 Transfer Student Monitoring/Financial Aid History Batch Inform Error/ Acknowledgment File Layout

The TSM/FAH Inform Error/Acknowledgment file is returned to the school by NSLDS upon receipt and acceptance of the TSM/FAH Batch Inform file. This file will list any errors or warnings submitted in the Batch Inform file. If there are no errors and no warnings, the TSM/FAH Error/Acknowledgment file will contain only a Header and Trailer record. Because there may be more than one error on any given Detail record, the number of records in the Error/Acknowledgment file may be greater than the number of Detail records sent in the Batch Inform file. Any error or warning in the Batch Inform file will be identified by a Field Number and an Error/Warning Code on the error detail record.

Batch Inform files will be processed as they are received. An Error/Acknowledgment file will be sent in response to each accepted Batch Inform file. Schools are responsible for correcting records that contain errors and students are not processed for FAHs or added to the Transfer Student Monitoring list. Corrections can be done by resending a batch record for the student in a future Batch Inform file, or by adding the student to the Monitoring list using the NSLDS FAP Web site or requesting a FAH via the Web site Report List.

There are two types of messages: Errors and Warnings. An Error means the record was not processed for a FAH request or added to the Transfer Student Monitoring List. The error must be corrected as noted above. A Warning indicates that the record was added to the Transfer Student Monitoring List, but the identifiers provided differ from those already on NSLDS. A FAH will not be produced in this case and there will be an error record on the file. The school should check its records to ensure the correct information was provided in the Batch Inform. If correct, no further action is needed. If the data is not correct, the school should reprocess the record with the correct information. Schools can assume that all records not in the Error/Acknowledgment file have been processed.

The following record layouts describe the Header, Detail, and Trailer records for the TSM/FAH Batch Error/Acknowledgment file returned to schools or school servicers by NSLDS.

4.1 Transfer Student Monitoring/Financial Aid History Batch Inform Error/ Acknowledgment Header Record Layout

The first record in the file will be a Header record, which will be populated as described in the following table.

5.0 Transfer Student Monitoring Alert/Financial Aid History Batch File Layout

The FAH is sent to schools when requested by the TSM/FAH Batch Inform file. The Transfer Monitoring Alert file is sent to schools by NSLDS only when a relevant change has been identified in the record of one of the students on the school's Monitoring List. Each type of file will be identified by the Header Title and by the message class. These changes include new or cancelled loans/Pell grants, disbursements, and changes to loan balances. The changes prompting an Alert file do **not** include newly reported Defaulted loans or Overpayments. That information will continue to be sent to schools via current Postscreening ISIRs.

The FAH and Transfer Monitoring Alert file will contain the student's full NSLDS Financial Aid History even if there is a change in a single loan or Pell grant. The Pell, Loan, or Aggregate records that contain a change causing the Alert will be flagged to enable schools to quickly identify the changed records. A record will be flagged as a change if the information is different from either the most recent ISIR record or the most recent Alert, whichever is more current.

This file can be received in either an Extract or Report format. The file will contain separate record types: Aggregates, Perkins, Flags Record, Name History Record(s), Overpayment Record(s), Pell Payment Record(s), and Loan Detail Record(s).

NSLDS will send an Alert file whenever there is information to report to a school. Since NSLDS gets new data daily, it is possible, but not likely, that a school could receive an Alert file daily. Whenever NSLDS sends an Alert file, an e-mail notice will be sent to the e-mail address as specified in the Transfer School Profile on the NSLDS Web site.

5.1 Transfer Student Monitoring Alert/Financial Aid History Header Batch Record Layout

The first record in the file will be a Header record, which will be populated as described in the following table.

- **Report Type**—Designates whether the file is in Report or Extract/Data format. It's also identified by message class name.
- **Date**—Date the file was generated from NSLDS.
- **Sequence Number**—Populated with 01 in this field, if it is the first FAH or Alert sent to the school or servicer on a given day. If more FAHs or Alerts are generated for that school or servicer on the same day, this number will increment for each subsequent file.
