Introduction

The National Student Loan Data System (NSLDS) uses codes to describe various loan conditions and events. These codes are concise and, like an abbreviation, describe a whole series of events using only a character or two. This saves considerable space in the database and simplifies the processing of data. The code tables contain a number of data elements listed in the Data Dictionary (Appendix A) (e.g., Code for Loan Status, Type of Deferment). The following tables list the available codes and their definitions. You should carefully match your codes to those used by NSLDS.

When the Data Dictionary refers to a field that “Must be a valid code” from a particular code table, use Appendix B to find the table. Using a code not listed on a specified table will cause an error.

Some of the codes, along with their associated dates, provide a full history of events on a loan in NSLDS. For example, you can view data in NSLDS showing when a loan was first originated (ID status), when it went into repayment (RP status), any deferment periods (DA status), and when it was paid in full (PF status). Recording of each event provides the Federal Perkins program administrators and researchers with key information on loan history. Thus, the codes are critical to the operation of the NSLDS.

Table B–2: Perkins Loan Status Codes

Default Defined: For purposes of NSLDS and determining which loan status code to use, the definition of default is the same as is used to determine the school’s cohort default rate: “If a borrower’s default has persisted for at least 240 consecutive days (for a loan repayable monthly), or 270 consecutive days (for a loan repayable quarterly), the loan must be included in the school’s cohort default rate.” When a borrower is in default based on the cohort default rate definition, the school reports the loan using the appropriate default code from the table below.

To nullify a Perkins loan, report the loan identifiers, setting the loan status to 'CA', and setting the Loan Status Date to the date the loan was nullified. All other fields in the record may be set to default values. The loan will be nullified (status changed to 'CA') and the dollar values set to zero. When a borrower is in default based on the cohort default rate definition, the school reports the loan using the DF code or one of the other default codes if appropriate.	OPEN STUDENT INELIGIBLE Amount of Outstanding Principal Balance must have a positive balance.

Table B–3: Perkins Loan Transfer Codes

Table B–3: Perkins Loan Transfer Codes			
Code	Status	Definition	Reporting Rules / Data Providers
AE	Assigned to U.S. Department of Education or TPD (Loan Transferred)	<p>A loan that has been assigned and accepted by the U.S. Department of Education for collection or to TPD. Once the loan has been successfully reported with the AE code (i.e., it contains no errors), you should stop extracting the loan since such loans will error out of future submittals.</p> <p>A loan must be successfully reported to NSLDS with a valid Loan Status Code (other than AE) before the loan can be reported as assigned to ED or TPD. Loans first reported in an AE status (i.e., assigned to ED) will be rejected.</p>	<p>Report the “Certification Date” (item #12, on the Federal Perkins Loan Program/NDSL Assignment Form: Institutional Certification). Report the ‘Certification Date’ in the Date of Loan Status field (field code 262), and ‘AE’ in the Loan Status code field. Department of Education will match on this certification date to assume ownership.</p>

Perkins Loan Transfer Code Notes

In order to transfer a loan from a school or its third party service provider to the Department of Education (e.g., a Perkins loan assigned to the Department), a complete ‘handshake’ must take place between the two data providers, that is, the current school or its third party servicer must release the loan which then enables the Department to report on the account and release the account from the school or its third party servicer provider. NSLDS does not consider this as a loan status code but, rather, a loan transfer code. Schools or their third party service providers use the code AE to transfer, or assign a loan to the Department and must also update the “Date of Loan Status” field with the date from the school’s certification on the assignment form used to assign the account. The “Certification Date” from Item 12, on the Federal Perkins Loan Program/NDSL Assignment Form: Institutional Certification **must** be used as the date of the loan status; this date would be entered in the Loan Status code field.

Although the loan transfer code, AE, uses the loan status code field on the Database Extract file, it is NOT a loan status code and does not update the loan status code field in NSLDS. Instead, it indicates, along with the updated certification date in the loan status field that the loan is in transit to the Department’s data provider. It is only when the Department’s new data provider reports on the loan that it is actually transferred to the Department. If the previous data provider reports the loan with a non-transfer loan status before the Department’s data provider reports on the loan, NSLDS will assume that the transfer request was incorrect and the loan will be retained by the school or its third party service provider.

Requirements

The current data provider must successfully report a loan to NSLDS before the data provider can report the loan has been transferred. Edits will be added to ensure a loan exists on NSLDS before a transfer is processed. The edits are necessary to ensure historical data is loaded to NSLDS before the loan is transferred. For example, deferment information on a school-held loan is not transferred to DMCS with a loan. If the school did not load the loan to NSLDS before the transfer, the deferment data would be lost.

The new data provider will not be able to report on a transferred loan until the current data provider successfully notified NSLDS that the loan has been transferred. Similarly, the previous data provider continues to hold the loan until the new data provider successfully reports. Because of the various reporting cycles, the loan may not be updated for 30–60 days. The current method for reporting on a transferred loan by data providers is not changed.

Since neither DMCS (GA556) nor TPD (GA582) makes new loans, they will only be permitted to report on loans specifically transferred to them by another data provider. An exception process has been established to override this rule where warranted (e.g., old loans never loaded to NSLDS). A tracking process has been established to monitor loan transfers and to work with data providers who experience difficulty in either reporting a loan transfer or reporting on a loan transferred to the data provider.

Assumptions

The most recently reported Loan Status Code will continue to be used by NSLDS until the new holder reports on the loan. The new data provider will be able to report and/or update the Loan Status Date to a date before the loan was transferred.

Once a loan has been successfully reported to NSLDS as a transferred loan, the point of contact for the loan will be the new data provider. For example, School 1 transfers a loan to DMCS. DMCS becomes the contact as soon as the transfer is reported to NSLDS by School 1.

If the previous data provider (School 1) reports on the loan with a non-transfer loan status before the new data provider (DMCS) reports on the loan, NSLDS will assume that the transfer was incorrect and the loan will be retained by School 1.

To track loans being transferred, an NSLDS table was created. The table will allow the tracking of each loan transferred including the data provider releasing the loan, the date released, the new data provider and the date the new data provider took possession. If a loan is reported as transferred but is not updated in a timely manner by the new data provider, NSLDS will follow up with the new data provider.
