No.	NSLDS Error	Comments/Resolutions	Implementation
8	Field Code: 123 Field Name: Date of Guaranty Agency Principal / Interest Collections Error Code: 525 Error Message: Date must be > preceding date	**Resolution:** NSLDS implemented a field level tolerance that is evaluated during the submittal load process on a GA specific basis. Currently, NSLDS assesses the submittal file to determine if at least 50% of the loans with claim-related data plus the loans in error* have a collection, if they do then all collection data are processed without consideration of preceding date errors. * NSLDS makes an assumption for the purpose of this threshold that all errors are claim-related.	June 6, 2001
9	Field Code: 127 Field Name: Date of TOP (IRS Offset) Principal/Interest Collections Error Code: 525 Error Message: Date must be > preceding date	**Resolution:** NSLDS implemented a field level tolerance that is evaluated during the submittal load process on a GA specific basis. Currently, NSLDS assesses the submittal file to determine if at least 20% of the loans with claim-related data plus the loans in error* have TOP Offset data, if they do then all TOP Offset data are processed without consideration of preceding date errors. * NSLDS makes an assumption for the purpose of this threshold that all errors are claim-related.	June 6, 2001
10	Field Code: 92 Field Name: Date Deferment Starts Error Code: 525 Error Message: Date must be > preceding date	**Resolution:** NSLDS modified edits to delete deferments if there is a backward correction to the loan status where the old status is "DA". Example: If NSLDS has the current loan status as DA with a date of 2001-04-01 and a GA submits a loan status of RP dated 2001-02-01. NSLDS will delete the loan status of DA with a loan status date after the RP loan status date. If there was an additional DA loan status on NSLDS system with a loan status date of 1999-01-01, NSLDS would not delete it from the system because it was before the RP status dated 2001-02-01	March 2001
