Gainful Employment Data Extract Record Layout

The *GE Data Extract File Report (GENEX1)* allows School users to request an ad-hoc extract of the Gainful Employment data supplied by the institution currently residing on NSLDS. Report parameters include the School Branch ID, Award Year, CIP Code, Credential Level, Program Attendance Status, Program Attendance End Date Begin, Program Attendance End Date End, History, and Extract Type. The default (*) indicates “all” for that field selection. The report output can be sorted by Award Year, CIP Code/Credential Level, Last Name/SSN, SSN/CIP, Program Attendance Begin Date, or Program Attendance End Date. The report will be delivered to the SAIG mailbox (TG number) associated with the FSA User ID that requested the report. The fixed-width extract is delivered as message class AHSLEOP.

This document contains the layouts for the header, detail, and trailer records of the fixed-width GE Data Extract File Report. Each individual report requested online will generate one header record, one or more detail records, and one trailer record. The record layout table contains the position, the data element name, description, field format, and length as they appear on the extract.
