Gainful Employment Data Extract Record Layout

The *GE Data Extract File Report (GENEX1)* allows School users to request an ad-hoc extract of the Gainful Employment data supplied by the institution currently residing on NSLDS. Report parameters include the School Branch ID, Award Year, CIP Code, Credential Level, Program Attendance Status, Program Attendance End Date Begin, Program Attendance End Date End, History, and Extract Type. The default (*) indicates “all” for that field selection. The report output can be sorted by Award Year, CIP Code/Credential Level, Last Name/SSN, SSN/CIP, Program Attendance Begin Date, or Program Attendance End Date. The report will be delivered to the SAIG mailbox (TG number) associated with the FSA User ID that requested the report. The comma separated values extract is delivered as message class AHSCDEOP.

The record layout table contains the data element name, description, and field format as they appear on the comma separated values extract. Header and trailer records are not contained within this extract. The selection criteria entered on the Web Report does not appear in this output.

GE Data Extract File

Length = 350

Data Element	Description	Field Format
